

It is the Nerve

of a tooth which has been completely or nearly exposed that gives you that sharp, shooting, lancinating pain when subjected to pressure or something cold or hot or sweet. If you have such a condition in your tooth, it should receive immediate attention. There are but two methods of saving such a tooth, viz., removing the nerve and filling the roots or applying a proper non-conducting capping to the pulp. Either operation requires great skill. I have indeed been successful in my methods in such operations. If the tooth is beyond saving, my method of extracting deprives the operation of its pain and dread. All plates made to fit and appear as natural as each individual case will permit. I keep up-to-date in all methods of work and material. Call for examination and prices.

Fish and snake stories are not in it any more. A report comes from Polk county that a man over there went in his garden the other day, planted a cucumber seed and started on a run for the house, but before he could get out of the garden, the cucumber vine overtook him, wound around his legs and threw him down; he ran his hand in his pocket to get his knife and pulled out a cucumber six inches long.

There are two classes of people. One is going to Klondike, the other to stay at home. The latter needs clean, pure, fresh groceries at lowest living prices to protect his health and pocketbook. Millspie & Son can meet his wants better than any other firm in town.

Wednesday morning the writer went with S. A. Manning out to Thos. Morrison's place south of the Yamhill, to witness the operation of the hop press recently patented by Morrison & Manning. Of course we knew it was a success before going out there—Sam knew it and so did Morrison; they just thought it would gratify a newspaper man to behold the "slickest thing on earth," as Sam calls it. It certainly does the work claimed for it, making a perfectly uniform bale and doing the work much more expeditiously than the old style press. They claim for it a capacity of 60 bales per day, while other presses make only from twenty to thirty. Whatever diminishes the cost adds to the profit of hop growing.

The McMinnville broom not only sweeps clean and makes a reputation for itself, but is doing missionary work in advancing the home industry idea. We find this in the Oregon City Enterprise: "One of the many industries which could be introduced into Oregon with profit to the manufacturer and farmer, is the making of brooms. Reports from Yamhill county state that a broom factory has been in successful operation at McMinnville for the past year with very satisfactory results. The broom corn used by the factory is all raised in Yamhill county and the brooms manufactured are of as good quality as those imported from the east. The McMinnville broom is a home product and this new industry should be encouraged by all housekeepers. The broom, together with the beet sugar and hemp industries, should be fostered until the home demand for these articles is supplied."

Cap. H. S. Maloney, county surveyor, has moved his family from Willamina and occupies the dwelling at the end of F street south of Wes. Wallace. Mr. Maloney states that he has become a permanent citizen of McMinnville, attracted mostly by the superior school advantages, but he will give more time than formerly to work in the surveyor's office. McMinnville gains a good citizen.

A letter from A. Bowman states that he was at Lake Bennett at the time of writing and was engaged in building a boat. Frank Elliott went over with him taking the mules and about 400 pounds of stuff. Frank then returned for more of his goods while Bowman worked on the boat. Lon Hill was staying by the stuff, about 5 miles up the trail from Skagway. Bowman pictures the scenes and experiences as something awful, but gives no sign of discouragement. He refused an offer to work at boatbuilding at \$10 per day. He says the snow has already begun to fall on the mountains and that not one man in twenty will be able to get across this winter. If the boys do not get the stuff all over by the first of September or soon after, it has been arranged for Mr. Bowman to push on to Klondike and spy out the land against the time when they can get over.

PHYSICIANS BAFFLED.

Prof. R. S. Bowman, Instructor of Natural Science in Harisville College, Cured of a Severe Illness by Dr. Williams' Pink Pills for Pale People after Physicians Failed.

From the Republican, Columbus, Ind.

Prof. R. S. Bowman, the able instructor of natural science in the famous Harisville, (Ind.) College, is well and favorably known, not only as an educator, but also as a minister of the gospel, as for a number of years he was pastor of the United Brethren church at Charlotte, Mich., before coming to Harisville.

PROF. R. S. BOWMAN.

Some time ago he had a severe illness which was cured almost miraculously. A reporter hearing of this, interviewed him regarding his experience. Prof. Bowman was in the midst of his work when the reporter called, but he cheerfully gave him a hearing. "A year ago last fall," said the professor, "I broke down with nervous exhaustion, and was unable to properly attend to my duties. I tried different physicians but with no relief, and also used many different pro-

Mr. and Mrs. Roswell Conner returned from Portland Wednesday morning. Rosewell will now settle down for the practice of law, and he can probably lay claim to as thorough preparation as any young man who has entered the profession recently. He is studious, industrious and reliable, and we predict for him an honorable measure of success as a lawyer.

The rains that were threatening great damage to ungathered crops a week ago, practically ceased the first of the week and the weather conditions at present are very fine. Some damage has been done to wheat in shock, but most of it is all right. Oats are injured more than wheat, and the damage to straw is quite a serious item with many farmers. There are compensating features of the early rain.

Why suffer with coughs, colds and lagrippe when Laxative Bromo Quinine will cure you in one day. Does not produce the ringing in the head like sulphate of quinine. Put up in tablets convenient for taking. Guaranteed to cure or money refunded. Price 25 cents. For sale by Rogers Bros.

There was some sort of cutting-scrape in the vicinity of Simpson's hopyard near Amity last Saturday. A fellow who answered to the name of Henry George and hailed from Portland, needed a doctor. He claimed to have been assaulted by two Chinamen, but the surmise is general that Chinamen had nothing to do with the affair, that the fellow had been making himself unduly free with some of the females in the yard, and that he received a practical lesson in hopyard morals that he will not soon forget.

There is some prospect that work will be begun on the locks at Lafayette this season. The only obstacle in the way, we understand, is the protest of some of the Lafayette people against the site chosen and surveyed, which is delaying the work and may in the end help the real enemies of the enterprise to defeat it altogether. The Lafayette people are not to be blamed for wanting to conserve their own interests in the matter, but as a prominent resident of the place said to us this week, they should have done their work when the site was being selected. It does not matter to McMinnville whether the locks are at Lafayette or a little farther down. It matters less to this city than to the farmers for several miles adjacent whether they are built at all, but it means a good deal to all whether we shall be freed from the bondage of railroad monopoly by an open river the year round. We understand that Judge Denny, who has been reported as an opponent to the present site, is ready to make necessary concessions, and from conversation had with other prominent citizens of Lafayette we are inclined to believe they will take the broader view of the best interest of the whole community when it comes to a question of helping to promote or defeat the enterprise.

Laxative Bromo Quinine Tablets move the bowels gently, relieves the cough, cures the feverish condition and headache, making it the best and quickest remedy for coughs, colds and lagrippe. Cures in one day. "No cure, no pay." Price 25 cents. For sale by Rogers Bros.

New Shoe Store.

I will open a new shoe store for the sale of shoes and footwear in McMinnville about Sept 15th. The stock is just from the manufacturers. It was bought for cash, and I expect to sell for cash, giving the customer the benefit of a cash deal.

proprietary medicines, spending almost fifty dollars for these medicines alone. I then succumbed to a siege of the grip in the middle of winter, and was left in a much worse condition. My kidneys were fearfully disordered, and my digestion became very poor. I was indeed in a bad condition.

"A minister in conference learning of my condition advised me to try Dr. Williams' Pink Pills for Pale People. I had heard much about the wonderful curative powers of this medicine, but it was with reluctance that I was finally persuaded to try it, as it seemed that nothing could do me any good. However, I procured three boxes of pills and took them strictly according to directions. By the time the last dose was taken I was almost cured, and in better health than I had been for years. I continued using the pills awhile longer and was entirely cured. I can cheerfully recommend Dr. Williams' Pink Pills for Pale People."

Such was Professor Bowman's wonderful story which was further endorsed by the following affidavit:

HARTSVILLE, Ind., March 16, 1897.
I affirm that the above records with the facts in my case.

Subscribed and sworn to before me this 16th day of March, 1897.

Dr. Williams' Pink Pills for Pale People contain all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are sold in boxes (never in loose form, by the dozen or hundred) at 50 cents a box, or six boxes for \$2.50, and may be had of all druggists or directly by mail from Dr. Williams' Medicine Company, Schenectady, N. Y.

The vacancy caused by the unexpected resignation of Miss Etta Lewis, has been filled by the election of Prof. B. B. Barker of Salem. Prof. Barker took his degree from the university of Chicago last year, and has done post graduate work also in that institution. He is admirably qualified for the position he assumes in the college. He will teach English Literature, Rhetoric and Philosophy. The work of the school will begin next Wednesday, Sept. 15, with a public introductory service at 10 a. m., to which all the friends of the college are invited. Principal Reynolds of the city schools will deliver the introductory address.

A woman never really knows the meaning of happiness and content until she is the mother of a healthy, happy child. The health of the child depends on the health of the mother, both before and after birth. Most of woman's weakness and particularly the weakness that most strongly influences the health of children, comes from some derangement or disease of the distinctly feminine organs. Dr. Pierce's Favorite Prescription will cure troubles of this nature. It should be taken regularly by every woman during the entire period of gestation. It gives strength to all the organs involved, lessens the pains of childbirth and insures the health of both mother and child. Send 21 one-cent stamps to cover cost of mailing only, and receive free a copy of Dr. Pierce's Medical Adviser. Address, World's Dispensary Medical Association, Buffalo, N. Y.

Public School Notice.
Pupils who failed to take the examination, or who failed in the spring examination, or who failed to make the required average, will be expected to take the examination Friday, Sept. 17, 1897. Those wishing to take the examination will bring paper, pens and ink, and report to the teacher of their respective grades by 9 o'clock Friday morning. Those pupils who failed by going below the minimum in more than two studies will not be allowed to try over. School will open Monday Sept. 20, 1897. We trust that all will be ready to enter the first day, as a good start very often determines failure or success of the pupil.
