

## It is the Nerve

of a tooth which has been completely or nearly exposed that gives you that sharp, shooting, lancinating pain when subjected to pressure or something cold or hot or sweet. If you have such a condition in your tooth, it should receive immediate attention. There are but two methods of saving such a tooth, viz., removing the nerve and filling the roots or applying a proper non-conducting capping to the pulp. Either operation requires great skill. I have indeed been successful in my methods in such operations. If the tooth is beyond saving, my method of extracting deprives the operation of its pain and dread. All plates made to fit and appear as natural as each individual case will permit. I keep up-to-date in all methods of work and material. Call for examination and prices.

Do you know, that Elsia Wright carries a full line of lubricating oils for machinery? Owners of valuable harvesting and other machinery cannot afford to experiment with poor oils. He carries the best on the market and they are warranted not to gum. tf

P. A. Bates, the Lafayette miller, was in the city last Saturday. He was carrying his right hand in bandage as the result of an accident that occurred the day previous. There was some difficulty in the working of the elevator, which became choked up, and in trying to relieve it his hand was caught by the cups and fearfully lacerated. Though no bones were broken, the flesh was scraped to the bone, making a very painful and serious wound.

Elsia Wright and his threshing crew pulled in Tuesday night, having completed the season's work with the exception of a few acres. The grand total of grain threshed by them was 70,000 bushels, in a run of 34 days. This was the product of 3,400 acres, the daily average of threshing being 100 acres. The largest yield of wheat was that of Wm. Schmidt, on the Baker farm north of town, which averaged 33 bushels per acre. The largest yield of oats was a little over 50 bushels, many fields reaching this yield. The oats all weigh heavy this year. Mr. Wright makes the cheering announcement that no grain threshed by him was damaged, notwithstanding the great scare that prevailed during the rains. There is none of it, he says, but will bring the highest price in the market, and this statement is corroborated by the warehouse managers.

Mr. Grissen relates an incident which seems to be without parallel. One morning recently while milking in his stable he heard a peculiar chirping in the hay loft, and surmising that one of his hens had stolen her nest, and was hatching chickens, sent his little girl to investigate. She returned and declared she could find no nest. Mr. Grissen then made a search, and found the little chick in the dove-cote adjoining the loft, and with it was one young pigeon. The mother dove was seen to return soon, and Mr. Grissen says it was positively amusing to see the look of disgust with which the pigeon cast side glances at the chick, as if to say, "what have I done, to hatch such a thing as that!" A hen had evidently crawled into the cote and deposited an egg. The pigeon arriving later adding another egg, proceeded to raise her family. The chicken is being reared by hand, though it must have hovered with the pigeon two or three nights and had become very hungry.

The public sale of dairy cows by F. J. Canfield on Oct. 1st, will be a rare opportunity for dairymen or others to supply themselves with cows of undoubted merit. Mr. Canfield is an experienced and successful dairyman and his entire herd, which is offered for sale, has been developed to a high standard of excellence by careful selection, breeding and practical test. A person can be absolutely certain of getting a good cow at his sale.

The Excelsior Photo Co. has made special preparations for the latest effort in photography. The management is now in the hands of Mr. L. Bradley, known to most of the people of McMinnville. 40tf

W. A. Townsend has traded his big farm out west of town to George C. Sears, ex-sheriff of Multnomah county, for a big stock ranch in the John Day country, containing something over two thousand acres, partly stocked with horses and cattle. An architect was to be up from Portland this week to plan certain improvements about the residence and it looks like the whole place was to be very materially improved.—Graphic.

Rev. Joseph Hoberg was treated handsomely by the Woodmen at their social Tuesday evening. After being kept on the gridiron for several minutes and done to a "turn by mystifying speeches, he was presented with a handsome silver mounted cane, in recognition of esteem in which he is held by the camp. "Regards of McMinnville Camp, W. O. W." is neatly engraved upon the token, and it is needless to say that the bond of mutual friendship and admiration between the donors and recipient has been sealed forever.

# TAKE NOTICE!

TO WHOM IT MAY CONCERN:

## PUBLIC SALE of DAIRY COWS.

On Friday, October 1st, 1897, commencing at one o'clock p. m., at my farm 2½ miles south of Carlton, I will sell to the highest bidder TWENTY HEAD OF DAIRY COWS, grade Agrshires and Jerseys, calved since July or about to bring calves, and eight head JERSEY GRADE HEIFERS. Also a quantity of clover hay will be sold.

Terms—one year's time on approved notes bearing 10 per cent interest. No interest will be charged on notes paid within six months.

F. J. CANFIELD.

Cupid breaks his bow at the sight of a face full of pimples. Hollow cheeks, sunken eyes, and a sallow complexion will defy his best intentions. Beauty is more than skin deep. The skin is merely the surface on which is written in plain characters the condition of the body. Dr. Pierce's Golden Medical Discovery is good for the complexion because it makes the whole body healthy—because it clears and purifies the blood, makes the digestion strong and clears out impurities of all kinds. By increasing the ability to assimilate nutritious food, and infusion of its own ingredients it enriches the blood and so makes solid, healthy flesh. It cures diseases of the lungs, liver, stomach, bowels, skin and scalp, simply because all these diseases spring from the same cause—a disordered digestion and consequent impure blood.

Mr. and Mrs. George Barnhart leave to-day for Redlands, Cal. They go by the steamer Columbia to Frisco, and will probably visit a short time in northern California.
