The use of the surgeon's knife is be coming so general, resulting fatally in such a large number of cases, as to occasion general alarm.
Mr. William Walpole, of Walshtown,

South Dakota, writes; "About three years ago, there came under my left eye a little blotch about the size of a small pea.

It grew rapidly, and shooting pains ran in every direction. I became alarmed and consulted a good doctor, who pronounced it canmust be cut out. This I would not consent to, having little faith in the

indiscriminate use of the knife. Reading of the many cures made by S. S. S., I determined to give that medicine a trial, and after I had taken it a few days, the cancer became irritated and began to discharge. This after awhile ceased, leaving a small scab, which finally dropped off, and only a healthy little scar remained to mark the place where the destroyer had held full sway.
