Isn't five cents when one is speaking of Clocks; it will and the guarantee "thrown in." My nickel alarm clock makes faces at the poor trash sold in the dry goods stores and one place and another for less money. Mine does not have soft pinions and a case as thin as tin. The difference is in the Clock, and the subsequent cost of keeping it going. Mine stay good, and

that's worth considering. I have a good variety of Nickel Alarm Clocks, some in fancy cases, some so small you can almost use them for a watch. I have a Nickel alarm for very sleepy folks, that rings for fifteen minutes, unless you shut it off, and you can't "turn over for another snooze." I can suit you in the Nickel Clock line.
