"Durability is Better Than Show."

The wealth of the multi-millionaires is not equal to good health. Riches without health are a curse, and yet the rich, the middle classes and the poor alike have, in Hood's Sarsaparilla, a valuable assistant in getting and maintaining perfect health. It never disappoints.

Scrofula.—Three years ago our son, now eleven, had a serious case of scrofula and erysipelas with discharging sores, discharging and itching constantly. He could not walk. Several physicians did not help for sixteen months. Three months' treatment with Hood's Sarsaparilla made him perfectly well. We are glad to tell others of it. —Mrs. DAVID LAIRD, Ottawa, Kas.

Nausea.—"Vomiting spells, dizziness and prostration troubled me for years. Had neuralgia, grew weak and could not sleep. My age was against me, but Hood's Sarsaparilla cured me thoroughly. My weight increased from 125 to 143 pounds. I am the mother of nine children. Never felt so well and strong since I was married as I do now." —Mrs. M. A. Waters, 1529 33rd Street, Washington, D. C.

Eczema.—"We had to tie the hands of our two-year-old son on account of eczema on his face and limbs. No medicine even helped until we used Hood's Sarsaparilla, which soon cured." —Mrs. A. V. Wyck, 123 Montgomery St., Paterson, N. J.

Hood's Sarsaparilla
Never Disappoints

Hood's Pills cure liver ills, the non-irritating and only cathartic to take with Hood's Sarsaparilla.

Invented the Musical Scale.
The musical scale is said to have been invented by Guy Aretino, a monk of Arezzo, about 1025. His scale, with material differences in naming some of the notes, was substantially the same as now in use.

Two bottles of Pilo's Cure for Consumption cured me of a bad lung trouble. —Mrs. J. Nichols, Princeton, Ind., Mar. 26, 1895.

Nine-tenths of all the sewing machines used throughout the world are made in the United States.

OPEN LETTERS FROM

Jennie E. Green and Mrs. Harry Hardy.

JENNIE E. GREEN, Denmark, Iowa, writes to Mrs. Pinkham:
"I had been sick at my monthly periods for seven years, and tried almost everything I ever heard of, but without any benefit. Was troubled with backache, headache, pains in the shoulders and dizziness. Through my mother I was induced to try Lydia E. Pinkham's Vegetable Compound, and it has done me so much good. I am now sound and well."

Mrs. HARRY HARDY, Riverside, Iowa, writes to Mrs. Pinkham the story of her struggle with serious ovarian trouble, and the benefit she received from the use of Lydia E. Pinkham's Vegetable Compound. This is her letter:

"How thankful I am that I took your medicine. I was troubled for two years with inflammation of the womb and ovaries, womb was also very low. I was in constant misery. I had heart trouble, was short of breath and could not walk five blocks to save my life. Suffered very much with my back, had headache all the time, was nervous, menstruations were irregular and painful, had a bad discharge and was troubled with bloating. I was a perfect wreck. Had doctored and taken local treatments, but still was no better. I was advised by one of my neighbors to write to you. I have now finished the second bottle of Mrs. Pinkham's Vegetable Compound, and am better in every way. I am able to do all my own work and can walk nearly a mile without fatigue; something I had not been able to do for over two years. Your medicine has done me more good than all the doctors."

The Modern Method.
"It's an awful thing not to know where one's next meal is coming from." "Yes, but a good many of us married men are experiencing it since the grocery stores got advertising bargain sales." —Indianapolis Journal.

For Working Butter.
The correct method of working butter is by pressure precisely the same as pie crust is rolled with a rolling pin. Fold it over and roll again, and repeat until done. The reason this is not practicable in hand working of butter is that more pressure is required with butter than can be done by the unaided hand. But one of the very best styles of butter-workers, known as the roller butter maker, is exactly on this principle, the roller being on a sliding frame which is pushed back and forth

over the butter, the handles being arranged to give a leverage, as shown in the first picture. This style, says the Orange Judd Farmer, is not easy for the average farmer to make, and for a small dairy a simpler style gives satisfaction. It consists in making a long and large rolling pin, putting an iron pin in one end, inserting this in a hole at one end of the frame considerably larger than the pin, taking hold of the handle at the other end and using it as both lever and rolling pin, as in the second picture. The roller can be round or six or eight-sided, and it is preferred to have it diminish in size toward the end which is furthest from the handle.

Un'que Picket Fence.
The cut shows a way of making a picket fence that is at once strong and cheap. No heavy rails are needed. Two narrow strips of board at top and bottom hold the pickets securely nailed between them. The strips are "let in" to the posts. For a sheep fence this mode of construction has great advantages. The pickets can be a foot wide—ordinary boards sawed into picket lengths, and the strips three inches wide. Such a fence can rapidly be put up and will prove very inexpensive and strictly sheep and dog proof.—American Agriculturist.

Sod Land.
Reducing sod land is difficult unless the proper crop is grown thereon. When a heavy sod is turned under by the plow it may not rot for a long time, because the grass will grow again and take possession. It will not do to broadcast seed upon such land, as the grass will crowd out all other plants. The best plan is to cut up the land with a disc harrow in the spring if the land is plowed in the fall, and plant early potatoes on the location. It may require both the cultivator and the hoe to keep down the grass. After the early potatoes sow Hungarian grass and plow it under before it seeds (or after the first mowing), followed by rye in the fall and corn the next spring.

Cultivation for Pear Orchard.
The system commonly practiced some years ago was that which was applied to the apple, but on account of the destruction caused by the pear blight, and owing to the fact that the pear blight flourished most in varieties which made a vigorous, rank growth and produced a large quantity of sappy wood, it has been found to be not well suited. Pears with a firm, determinate growth are less affected than those of luxuriant growth. A study of these facts has brought about a revolution in methods of cultivation. Frozen Meat.
Fresh meat may be kept a long time if thoroughly frozen. It should, however, be hung in pure, cold air until a thin coating, when it should be at once cooked or salted. Freezing the meat has opened its pores to air, and so soon as this begins to be tainted putrefaction soon sets in. Hence the pork that has once frozen through is harder to keep than that which was packed when only the animal heat was out of it.

Poultry Notes.
See that the ducks are in the house at night.

Hard-boiled eggs are a treat to young turkeys.

In stormy weather hens should be kept in doors.

Overfeeding and lack of freedom will cause indigestion.

Eternal vigilance is the price of success with poultry.

Exposure to bad weather will hurt any stock, young or old.

Clean off the dropping boards every other day during winter.

Ducks are heavy feeders and must have all they want to eat.

Buy eggs in season, only from breeders that you know are reliable.

Hens should have some corn, but corn alone will not do for laying hens.

No fowl should be allowed to get thoroughly wet except a duck or goose.

Gather a supply of leaves and store them in dry places for your winter scratching-pen.

A little salt and pepper—just enough to season—is the right amount to add to morning mash.

Dairy Tips.
Cold weather is obviated by a warm stable.

Cows with long horns usually have short milk records.

There is less labor involved in caring for cows properly than improperly.

A lazy bull is usually an ugly one. Break him to work and he will become gentle.

Frozen compost heaps under the stable windows are a menace to dairying in the spring.

If a dairyman possesses an leechouse, many vital questions of milk care in summer are very easily solved.

Fancy stalls and fancy stables are not absolutely necessary, but hygienic, comfortable and humane ones are.

Dairymen who are able to sell their butter for a uniform price of 25 cents per pound the year around make a handsome profit on their product.

If you have a cow that coughs, and tends towards emaciation on good feed, regard her with suspicion, and at once isolate her from the rest of the herd till she can be tested for tuberculosis.

The man who believes in sheltering pigs, calves and poultry in the same stable with his cows is only one step in advance of the peasant who keeps his live stock in a section of his dwelling house.

UNHAPPY WIVES AND HUSBANDS.

An English paper several years ago stated that in the year 1854 there were in London, 112 runaway wives, 254 runaway husbands; 415 married people legally divorced, 17,345 living in open warfare; 13,270 living in private misunderstandings; 55,340 living in mutual indifference, while only 117 were regarded as happy; 471 nearly happy and 12 perfectly happy.

An American philosopher, after studying the facts and circumstances of the cases, has come to the conclusion that all divorcing families is the offspring of disease in some form or another, and that in a great majority of cases disease may be entirely removed and husbands and wives made entirely happy. It has been done in innumerable instances, and what has been done heretofore, may be repeated.

The following are a few cases where whole families have been made perfectly happy by removal of the diseases which became so discordant.

PONDER OVER IT.
A prominent building owner, with years of experience, gave the following instructions to his architect: "I have had my experience with kalsomines and other goods claimed to be just as good as Alabastine. I want you to specify Alabastine on all my walls; do not put on any other manufacturers' dope, if they furnish it for nothing. Alabastine is right, and when I shall cease to use it I shall cease to have confidence in myself or my own judgment."

A Man Eighty-two Years of Age Cured in Dixie, Ark.

One of the oldest and best known men in Perry County has the satisfaction of enjoying perfect health after suffering for more than fifteen years with chronic prostatic enlargement and inflammation, and will cheerfully tell anyone how he was cured.

MR. H. L. TRUNDLE.
We want this to reach the eyes of every reader of this paper. Mr. H. L. Trundle, Dixie, Ark., a eighty two years of age, as hale and hearty a man of his age as can be found in the State of Arkansas; in fact, he looks as young as a man of fifty. For more than fifteen years Mr. Trundle was a slave to prostatic disease. You men who are afflicted know what it means—the days of sunset, the nights of torture and weakness, the pain, the frequent calls to pass water and the inability to do so. He could scarcely get about the house, feeble, trembling and racked with pain from head to foot.

In this condition he read the startling announcement in his paper that a marvelous new method for curing prostatic disease had been discovered. He wrote to the address given for full particulars, and at once obtained the remedy. In less than ten days more he had the satisfaction of experiencing relief. His case was chronic, deep seated, and the chances of recovery on account of his age were against him. Yet sixty days of continuous use of the famous Solvent-A-Herns method cured him.

For men who are afflicted, have the same experience if you do what Mr. Trundle did; he used Solvent-A-Herns, a new-method treatment. It is described in two nicely written books which you can get free of charge, by mail, by sending your name and address to the Empire Medical Company, 215 N. 5th Street, Boston, Mass. It won't cost you a cent to get the information, and it may be worth hundreds to you. Write today, and refer to this article.
