# THREATEN TO CROSS BORDER Loss of Life and Property in Northern

Uneasiness in Arizona.

Mexican Government Has Sent a De tachment of Artillery and Two Gatlings Against the Indians.

St. Louis, Aug. 5 .- A special to the Globe-Democrat from Nogales, Ariz., says: Two Gatling guns and a detachment of artillery soldiers from the City of Mexico, via El Paso, have been hurried southward en route to the scene of the Yaqui war. The troops are being marched across the mountains from points in the states of Chinow there, and other reinforcements are rushing in from all quarters.

It is reported that emissaries have been sent by the Yaqui leaders to ranches and mines all over the state of Sonora wherever men of the tribr their compatriots already in the field. and many Yaquis who are employed in the big mining camps and on haciendas as laborers have disappeared.

Even in this vicinity, 300 miles distant from the scene of hostilities, the Yaquis employed in various kinds of work are in a state of disquiet, quitting their employment and going away, and those coming here from outside points in Arizona, where there have been many Yaqui laborers, report the same condition of affairs. They usually travel by night, and nightly small squads are reported passing through the town or along the road near by, all going in a southerly direction.

Some fears are expressed of a descent upon the town similar to that of August, 1896, when an attacking party took possession of the Mexican customs house in the early hours of the morning and were dislodged only after a severe battle in which they left nine Both Americans and Mexicans Said to men dead on the field and carried away some 20 wounded. ## WORSE THAN REPORTED. Terrible Work of the Storm in North-

ern Florida. Tallahassee, Fla., Aug. 5 .- The first train since Monday from Carrabell, through the storm ridden gulf coast

section, reached here this afternoon. The train crew and passengers agree in stating that reports sent out of the destruction wrought by the storm have been extremely moderate. Carrabell is literally wiped from the map. Her

docks and wharves, containing about 400,000 feet of lumber and 50,000 barreis of rosin, were quickly swept away. Thirteen or 14 large lumber vessels in the bay were swept ashore, and are now lying well upon dry land. These vessels contained several million leet

of lumber. No information is obtainable as to the loss of life from these vessels or from the large fleet of fishing boats in the neighorhood. Only two or three huts are left

standing in Carrabell, and one colored woman is known to have been killed by tober. the falling of a house. Citizens of Carrabell are in a state of wild confusion, and are flocking in every direction for relief. The town is isolated and the wires are still down.

#### Now in Washington State.

Washington, Aug. 5 .- Marine hospital officials at Hampton have succeeded in tracing and locating a former inmate of the soldiers' home, who is believed to have brought yellow fever Thomas. He arrived at the home on a transport from Santiago, where he had been visiting from July 2 to 5 last. He was admitted to the home as a veteran and soon after developed chills and fever. In the light of subsequent events experts believe there is little doubt he was affected with a mild case of yellow fever, although it was not diagnosed as such at the time. When well enough to travel, he left the home and his baggage was sent to Phoebus. The man himself went to Columbus

## OUR FINANCIAL POWER.

London Cannot Get From New York the Gold That It Needs.

R. G. Dunn & Co. in their weekly review of trade say:

July failures have been smaller than in any month of which there is record smaller than in any other month. Surprising contrasts are shown by comparisons of small with large failures in different years and in no class of business without some large failures not attributable to present influence, does the aggregate equal the average of the past six years. London again recognizes the financia! power of this country. The Bank of England virtually admits that it cannot draw from New York the gold it needs; exchange moves to the importing point; over \$1,000,000 starts from Sidney to gan Francisco. London's net buying of stocks has been 40,000 shares and bills against produce to be shipped are very heavy.

This describes a repetition of finance not unlike that in industries. Europe is searching for wool here at 50 cents a pound, scoured, and for pig iron at \$20 a ton. A vast demand for both materials has fallen upon the commercial world which this country alone appears

able to meet for its own needs. Wool shipments from Australia have been surprisingly little below those of last year, but Europe talks of a wool famine, while this country has on hand . year's consumption or more, besides this year's clip, and prices are not yet as high as they were in February of last year, when stocks were many mil-

lion pounds larger. Failures for the week have been 182 n the United States, against 196 last year, and 23 in Canada against 21 last
