THE OLD HOME.

In the quiet shadow of twilight I stand by the garden door, And gaze on the old, old homestend, So cherished and loved of yore. But the ivy now is twining Untrained o'er window and wall; And no more the voice of the children Is echoing through the hall.

Through years of pain and sorrow. Since first I had to part, The thought of the dear old homestead Has lingered around my heart, The porch embowered with roses, The gables' drooping eaves,

And the songs of the birds at twilight Amid the orchard leaves.

And the forms of those who loved me In the happy childhood years Appear at the dusky windows,

Through visions dimmed with tears, I hear their voices calling From the shadowy far away,

And I stretch my arms toward them In the gloom of the twilight gray.

But only the night winds answer, As I cry through the dismal air; And only the bat comes swooping From the darkness of its lair. Yet still the voice of my childhood

Is calling from far away, And the faces of those who loved me Smile through the shadows gray.

A College Boycott.

00

. 00

N a cloud of dust and smoke the train creakingly drew up to the little station. A score or more of passengers alighted. ed. There were men and young women on hand to note the arrivals. The coming of that train was one of the daily events in the college town. It was

the only link that bound the quiet place to the noisy outside world.

But this particular train meant more than usual. It brought visitors, parents, friends, trustees. For this was the commencement time.

Among the arrivals was a quietly dressed man of middle age with a gray mustache and keen blue eyes. A tall young man pushed forward with outstretched hand.

"Father!"

"John, my son!"

A moment later the two were walking up the long main street beneath the beautiful maples, the young man lightly carrying the heavy traveling bag.

"By George, my boy," cried the older man, as he drew a long breath and gazed admiringly at the youth, "it does me good to see you-and to see you here. I seem to see myself again trudging up this very street-not quite so tall, perhaps, but I fancy much the same build. And how are you, my lad? You know I haven't laid eyes on you for nearly a year."

"Ouite well, father, and in excellent

on me because I sympathized with her cheers and the college yell." and paid her some attentions. But must meet her."

"Yes, yes," said the older man, a liteh?"

"That's about the size of it, dad. Funny, isn't it?" "Very. But where are you taking to be lifted," he laughingly answered.

me?" "To my boarding place. I thought you'd rather room with me than go to the hotel.

"Of course. And who is your landlord?"

"It's a landlady, dad, and I'm her only boarder. Her name is Spencer-Mrs. Julia Spencer."

"Julia Spencer Do you know who Julia Spencer is?"

"Why, no, dad, I don't." "She was your dead mother's dearest and oldest friend. She was Julia Ran-

ney then, the prettiest girl in the village. At least she was until I happened to meet some one prettier. Why, boy, Julia Spencer might have been your mother."

"I'm very glad she isn't," said the young man. "And why?"

"Because I mean to marry Julia Spencer's daughter."

The older man stopped short. "Put down the bag," he said. His bright blue eyes sought his son's. "Have you set your heart on this?"

he slowly asked. "Yes, father, I have."

"And you really mean to marry and settle down and take an active interest in your father's affairs? He's growing were many young old and needs you."

"Yes, dad."

The older man put out his hand and the younger firmly gripped it.

"This is not," said the father, "quite the surprise you may think it. Prof. Patton wrote to me some time ago preparing me for what he seemed to think was inevitable. Still, it is a little startling, coming from your own lips."

"Annie has just turned the corner." murmured the young man. "Will you meet her now?"

"I'll meet her mother first," said the father. "You keep the daughter away for a half hour or so. Which is the house?"

"The cottage back of the big tree, dad." The older man picked up the bag,

and the younger one turned and walked rapidly down the street.

"John," the older man called after him. "Well, dad?"

"Don't let it slip your mind that the boycott must be lifted."

The young man smiled back at his father and the latter wistfully watched him as he hastened up the street toward the trim-built young woman who was slowly approaching.

"Just like me," he muttered; "same old obstinacy. Ready to go through thick and thin for what he wants. God

bless him, he's all right!" With which closing apostrophe the

girls-her college mates, you know- John Sheldon Sturges, has just scbsnubbed her because she couldn't dress scribed \$20,000 for the completion and quite up to their standard. And I equipment of the college gymnasium, think, too, they completed the boycott and I want you to give him three

There was a moment's hesitation and she's quite a clever girl, father. You then the cheers and yell were given with a royal will.

"Father, father," cried John, as the tle hastily. Then he suddenly laughed. elder Sturges pressed forward with "So you're boycotted, both for lack of hands outstretched to both his son and college spirit and lack of college funds, the blushing girl. "This isn't what I wanted at all."

> But the father only chuckled. "I told you that boycott would have

FEATS OF ARCHERY.

The Ancients Were Wonderful Masters of the Art.

Everybody has heard the story of William Tell, who shot an apple from the head of his son with a bow and arrow, and of the wonderful feats of Robin Hood, who roamed the green woods of "Merrie England," and could bring down a wild goose on the wing or split an opponent's arrow with his own.

There are many other curious feats of archery, however, that are not so well known. There was a famous William of Cloudesley, who split a hazel wand with his shaft from a distance of 200 yards.

Homer tells how Penelope promised her many suitors that he only should be favored

Who first Ulysses' wondrous bow should bend

And through twelve ringlets the fleet arrow send,

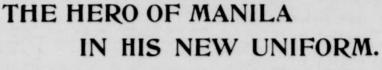

well knowing that only her husband could display such power, in proof of which, when they failed, he rewon his wife, for, bending his elbow,

string,

men, although they discarded the weapon in warfare, trusting to the charge and to hand-to-hand fighting. Many of the Roman Emperors were famous archers. It is said that Domitian would place boys in the circus at a considerable distance from him, and, as they held up their hands with the fingers outspread he would send the arrows between them with such nicety and accuracy of aim that he never in-

The wicked Emperor Commodus boasted that he never missed his aim or failed to kill the wild beast he shot with a single arrow. He would set a shaft in his bow as some wild beast was set free in the circus to devour a living criminal condemned to die. Just when the furious animal was springing on his prey the Emperor would strike it dead at the man's feet. Sometimes one hundred lions were let loose at once, in order that he with one hundred arrows might kill them. With arrows, the heads of which were semicircular, he would sever the necks of the ostriches in full flight.

The Persian archers, according to Charlian, practiced at a mark placed on top of a mast twenty-six feet from the ground. Toward this the horseman rode, with bent bow, at full speed. and in passing the mark turned and shot at it backward, sometimes to the right and sometimes to the left sel

ELECTRICITY ON THE FARM.

New York Farmer Putting the Power to a Practical Use.

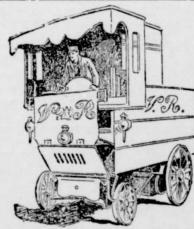

Application or electrical power to farm industry is a new development in the electrical field. There must be many farms on which are water powers, small or large, which could be made to yield electrical energy which would do a great deal of the ordinary farm work. An object lesson in this field is furnished by an equipment recently provided by the Westinghouse company for the farm of G. R. Beardslee, situated on both sides of the East Canadian Creek, near St. Johnsville, N. Y. There are two falls on the farm, one of sixty feet and the other of 180 feet in height. The lower fall is to be first used for furnishing power for the farm. A power house has been erected near by and a horizontal turbine with a 180-kilowatt (270-horse power) generator installed. From this central power house the electrical current is now transmitted by conducting wires to the farmhouse, to the barn, cattle sheds, grain houses and other places where lighting or power is required At these several points the direct elec trical current is utilized to drive motors which operate various machines. One motor of ten-horse power operates a hay-cutting machine, another motor of the same power runs a thrashing machine and a third motor operates a 44-inch circuluar saw for cutting logs. Each of these motors can be used separately or all at one time. The farmhouse is brilliantly lighted and comfortably heated by electricity, the result of a utilization of a waterfall's power. Electricity-heated flatirons are in the laundry and the kitchen contains a cooking stove also heated by electricity. In the dairy department are milk separators, churns and other appliances, all having electrical motor attachments. Outside the house several arc lamps turn night into day. The use of electric lights in the barn and outhouses greatly diminishes the danger of fire. Besides having all the electric power he wants for his own purposes, Mr. Beardslee sells 60-horse power to two knitting factories, and the money received from this source goes far to defray the running expenses of the electrical plant, which is said to have cost only "a moderate amount"-it should not be much more than \$5,000 .- Pittsburg Dispatch.

AUTOMOBILE MAIL CARTS.

London Postal Authorities Are Using Them in Out Districts.

In London the general postoffice automobile carts are being subjected to a severe test by the postal authorities. and it is believed that they will be put in general use. Those who have watched the new vehicle say they are faster surrounding the naval coat of arms of than any that have yet been tried. Their appearance is up-to-date in every way.

Imagine a wagon, not unlike the mail wagons of New York with an immense hood over the driver's seat, and back of it another case of handsomely polished wood, which is used for the sup-

flicted a wound.

spirits. "And the foot-ball knee?"

"Seems all right again. I'll prove it to you when we do a little of that hill climbing that you promised me."

"Yes, yes, my boy!" cried the old man with a merry laugh. "I'll show you where your father got in mischief in those dear old days. And to think that I've let all these years slip by without revisiting the old home."

As he spoke a group of merry boys and maidens passed by. They swept along without a glance at the tall youth. The older man turned and looked after them.,

"How's that, my boy?"

"What, father?"

"Why, it seemed to me that they meant to snub you. Do you know them?"

"Yes, father; they are all college mates. They meant to snub me all right. Fact is, I'm boycotted."

"Bless my soul! Boycotted?"

"Boycotted, father. It's a funny story. You know I came here determined to devote a year to rest and special study. I had the lame knee to get in shape, and there were certain lines of work I wanted to pursue with Prof. Patton. He's the only man in the college or in the town who knows who John Sturges' father is. Perhaps I wasn't very friendly at the start. The boys wanted me to join them in several things. They wanted me to try for the foot-ball team."

"But you promised me you wouldn't play again.'

"I kept my word, though it was a temptation."

The older man chuckled.

"What's the joke, father?"

"I was laughing to think of the greatest halfback of '96 trying for a place on a village team."

"Of course they didn't know, and they didn't like my excuse-the knee. I said I was too busy. That was the beginning. I'm pretty sure they considered me stingy, too. Perhaps you don't know, but I made up my mind to go through this extra college year on the same amount that you worried through on. That didn't leave me much for outside trifles. When they asked me for a contribution for the symnasium fund I had to refuse them."

"That was quixotic, my boy." The young man looked his father

squarely in the face. "Besides, dad, there is a girl in the

rase."

The older man started.

"A girl in the case," he dully repeated.

"Yes, father. A-a charming girl. But poor, very poor. She started in at the professor bowed. "And now I vollege, but had to stop. Now she's have only to add," he went on more

older man caught up the valise and turned through the gateway that led to the cottage behind the big tree. He looked back once more as he as-

cended the steps. He could see the two figures, now side by side, coming | larly with the bow from the time they slowly up the street.

"Boycotted," he chuckled, "boycotted!'

It was the evening of President Lamson's reception to the graduating class. The assembly room was filled with the seniors and their friends. There had been music by the glee club, and the auditors were scattered in little groups about the apartment. Over in one corner sat John Sturges' father, with his old friend and preceptor, Prof. Patton. Near a window at the side of the room stood John Sturges himself, looking very well indeed for a penny-saving country lad in his immaculate evening clothes. By him stood a sweet-faced girl to whom he frequently bent in smiling deference. They were quite alone, John's classmates holding them-

selves strictly aloof, a fact which drew frequent amused glances from the boy's father. Then President Lamson held up his

hand. When all was still he beckoned to Prof. Patton. The latter arose and stepped forward.

"Friends," he said, "I have some pleasant news to impart. It will be, I think, of special interest to the graduating class. You all know, I am sure, that our gymnasium fund has grown with exasperating slowness, and that we are still a long way off from the desired amount. At least we were until five minutes ago." He paused and looked around.

"The fact is," he smillingly went on, "we have been entertaining a good fairy unawares. I am making this little explanation quite without the fairy's knowledge, because, as you will presently discover, he is the last man in the college who wants his merits advertised. And yet just a little explanation is due him. He came here quietly at his father's suggestion to add a year of special work to the education he had already received in one of the large Eastern colleges. He was prompted, too, by the necessity of giving a strained knee a long rest, an accident he received on the foot-ball field, for he was, if the daily journals are to be believed, the great half-back of '96. He came to this college because it was his father's Alma Mater and because that father, who has left his

many business interests and come across the continent to be here this evening, desired him to meet and know his early friend and old preceptor." Here teaching in a kindergarten. I think the | hurriedly, "that your old classmate. Idea.

dom missing. The Persian bow required a pull of 500 pounds.

It is said that the Turks were at one time very skilled archers. An old writer says that they practiced reguwere 7 or 8 years old to manhood. It was a common feat for them to shoot several arrows from a distance of ten vards into a mark not larger than a die. In July, 1792, Mahmoud Effendi, secretary to the Turkish embassy at London, shot an arrow 415 yards partly against the wind. In 1798 the Sultan of Turkey shot an arrow 972 yardsa feat scarcely surpassed by those attributed to Robin Hood.-Cincinnati Tribune.

Balzac Would Have Liked It.

"In my search for bits of life which literatesque, to use Bagehot's are word," said Gaster, gently rotating the cherry in his glass, "I seized with avidity on one that came to me yesterday in a letter from a relative in a distant town. I may say, by the way, that I don't approve of letters from relatives; they have to be answered.

"The town is the one I was born in: and, set in a waste of family affairs like an oasis, the letter told about the death of a woman whom I remember, I never made her acquaintance. She was a widow and lived with her spinster daughter, and I believe the first man to enter their house was the doctor who attended her in her last illness. They kept a big and savage dog for protection, and they rarely left the little yard which surrounded the house. All the work on the premises they did themselves, even to cutting the grass in summer.

"They kept no servants, and yet they were not poor. The postman rarely called. It was isolation complete and apparently desired.

"I was informed by the letter the widow died last week, and it seems that she left instructions for a funeral. One of the local ministers was asked to read the burial service, and my correspondent tells me that the daughter was the only other attendant, except the pall bearers. Had she relatives at all or friends anywhere? I do not know.

"The pall bearers were her tradesmen-the butcher, the baker, the grocer and the coal dealer who had supplied her wants.

"Her tradesmen were the pall bearers," repeated Gaster softly, and then asked curiously: "Would not Balzac have handled that well?"-New York Evening Sun.

Some men are so lacking in hospitality that they, won't even entertain ap

it mildly, and, because of his very posihis own dress, while his junior gloried in something showier.

The distinctive markings which the department has chosen for Admiral Dewey are, with one minute exception, such as Admiral Farragut chose for himself, and it is thought that this association with his old master of war may be all the more pleasing to Admiral Dewey, whose tastes in such matters are also refined and quiet.

It is highly probable that Admiral eight uniforms which the new regulations prescribe for him.

When calling on the President or some similar dignitary and at general muster on the first Sunday of every month, Admiral Dewey will wear what is termed "special" full dress-the garb, in fact, in which the accompanying cut shows him. This is his very swellest outfit, and consists of double-breasted coat, with tails lined throughout with white silk serge; trousers, also of navy blue broadcloth, with gold lace down the outer seams, a goldbanded cocked hat, epaulets, sword and full dress sword belt. The coat sleeves will be adorned with two two-inch stripes of gold lace with a single oneinch stripe between, and all surmounted by a single star. It is in this star that the distinctive marks differ from Admiral Farragut's, his star bearing a

small frigate embroidered in silver in the center, while Admiral Dewey's is plain. There will be a broad band of gold lace around the collar. His epaulets, like his shoulder straps, shown at the bottom of the picture, will bear four silver stars of five points each, the outer two being superposed upon gold fouled anchors, the anchors being the distinctive marks for an admiral as compared with the four plain stars of a general.

The full dress uniform is to be worn on all other occasions of ceremony, such for instance as in making the first visit to other officers of flag rank and on social occasions to which officers are invited in their official capacity. The coat of this uniform is like the evening dress of the civilian, and with the exception of the collar and the buttons down the front is adorned just as the "special" full dress coat is-spaulettes, sword and cocked hat fieing worn also.

On occasions of "ordinary ceremony," such as in boarding ships of years, and was president pro tem. of

wear the "service dress" uniform. Two old gentleman was indignant is putting | uniforms are set for evening wear and are described as "A" and "B." "A" tive stand, he was allowed to retain will be worn in the evening on occasions of ceremony to which the admiral may be invited in his official ca-

pacity, and "B" will be worn on social occasions to which he may also be invited in his official capacity. "A" uniform consists of an evening dress coat and waistcoat, laced trousers, cocked hat, epaulettes, sword and full-dress belt worn under the waistcoat, while "B" is the same with plain trousers and blue cap.

By the time Dewey has provided Dewey will never need but half of the himself with all the adornments which an admiring government prescribes he

will have parted with fully \$2,000 of hard-won pay. Half of the clothes he will never wear, but he must keep them on hand for the coming of the unexpected-the bugaboo of official life and the bane of the man whose figure will change.

FOR GOVERNOR OF KENTUCKY.

State Senitor William Goebel, the Candidate of the Democracy.

State Senator William Goebel, the nominee of the Democratic party for Governor of Kentucky, has taken an active part in politics since he ended his law studies. He has lived in Covington thirty-three years.

Senator Goebel was born in Pennsylvania and was brought to Covington by his parents in 1866. He was educated at Gambler College and at the Cincinnati Law School. He has been a member of the State Senate for eight

war, in making the first visit in port that body for one session. He has led upon commanding officers, on parades hot campaigns to carry through legislaof ceremony with enlisted men under tion as well as to secure his own elecarms, and at the ordinary Sunday in- ticn. The present elections act in Kenspections-excepting, of course, the to ky bears his own name, and was first one of the month-the admiral will p. used through his efforts a year ago. LONDON'S AUTOMOBILE MAIL CARTS.

plementary mails. Affixed to the dashboard is a large gong which gives a clear note of warning as the motorman steers his wagon in and out among the great mass of vehicles of all sorts that are always to be found on a London street. The seat is the entire width of the cart, which is of course four wheeled, and the motorman supplies or withdraws the power by means of a small lever not unlike the levers on the trolleys in Greater New York. He works this with his right hand and a brake with his left. The front wheels of the wagon are small enough to swing under the body of the vehicle. They work on a pivot and the wagon can be turned almost in its own length. It is the facility with which these wagons can be sent around a corner or worked through a winding lane between lines of other wagons and drays that makes the new motor cart valuable.

Longest Beard in the World.

Probably the longest beard in the world is that of a metal worker in Marseilles, France. The man is 74 years old. When 14 pears of age he had a beard six inches long. It grew from year to year, and now his hirsute attachment, when unrolled, reaches the respectable length of 10 feet 10 inches. When this man goes out walking he carries his beard rolled up in a big skein under his arm. Since he is rather small in size, measuring but 5 feet 3 inches, the beard is more than twice the man's height.

Deadly Bolt of Lightning.

The Bellefonte (Pa.) Watchman reports a remarkable death-dealing bolt of lightning which killed thirty sheep that were lying under a tree near Potter's Mills, Center County. Few of the flock escaped.

That which is known as the Higher Life, is nearly all hypocrisy and silliness.

It is easy to pick out the winning horse in a race when you haven't cent bat
