County Clerk Nelson has received his new registration books for voters, which will be opened with the new year, and closed on May 15th; previous to the election. The books comprise one large blank book to be kept in the clerk's office and a smaller blank book for use in each precinct on election day. In each of these books the voter registers his name, age, occupation and place of residence. In the last particular if the voter lives in the country it is necessary for him to specify the township, section and range, in which his home is located. If he lives in town the number of his block, lot, and the name of his street must be given. If he has no home of his own, he must specify the room he occupies in the house at which he lodges. The larger register is kept as a record in the clerk's office at the court house. The precinct register is furnished the judges with other election supplies, shortly before the election, and is in their hands for use on election day. If any person proposes to vote whose name cannot be found by the judges in the precinct register, the privilege of suffrage will be denied him.
