The Sheridan Sun of last week finds that Mr. H. F. Mayer of that city, who is now 84 years old, was a delegate to the Missouri state convention that elected delegates to the Whig convention that convened in Baltimore in 1840 and nominated Wm. Henry Harrison for the presidency. They were 14 days in going by boat to Wheeling, Va., from St. Louis, and staging the rest of the way to Baltimore. The Sun thinks that Mr. Mayer is probably the only man in Oregon who was a delegate to either of the great party conventions for the campaign of 1840.

Down in Portland they are asking the question, "Can the prohibitionists be recognized as a party organization in the coming local campaign?" The discussion of the matter arises from the following section in the law: "A convention of delegates, within the meaning of this act, is an organized body of delegates representing a political party, which, at the election next preceding polled at least three per cent of the entire vote cast in the state, county, precinct or other electoral district for which the nomination is made. An assembly of electors, within the meaning of this act, is an organized body of not less than 100 electors of the state, or electoral division thereof for which the nomination is made." On some of the offices they failed to poll the required three per cent. In this county the cold water people seem to be safe, having polled about 30 votes over three per cent on all offices for which they had a nomination.
