Mrs. Gates Writes to Mrs. Pinkham, Follows Her Advice and is Made Well.

"DEAR MRS. PINKHAM :- For nearly two and one-half years I have been in

DEAR MRS. PINKHAM:-I have taken Lydia E. Pinkham's Vegetable Compound as advised and now send you a letter for publication. For several years I was in such wretched health that life was almost a burden. I could hardly walk across the floor, was so feeble. Several of our best physicians attended me, but failed to help. I concluded to write to you for advice. In a few days I received such a kind, motherly letter. I followed your instructions and am my 'old self' again. Was greatly benefited before I had used one bottle. May God bless you for what you are doing for suffering women." - MRS. CLARA GATES, Johns P. O., Miss., Oct. 6, 1899.

The warring labor tactions of Louisville, Ky., have at last buried the hatchet and amalgamated under the banner of the Central Labor Union. Trouble has been continuous for two

SHAKE INTO YOUR SHOES

The Angora Goat. The accompanying picture shows what the Angora goat is like. Its chief value is in its fleece, which supplies a material known as mohair, that is now largely used in manufactures for serges and coarser woolen goods, braids and bindings, for which no sheep wool is fitted. It is of African

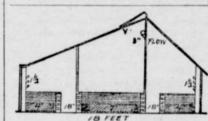

ANGORA GOATS.

origin, being kept in large flocks in that part of northern Africa known as Dongola, a part of the Soudan, where the British armies recently subdued the barbarous Dervishes. The skins of this kind of goat are extensively used for leather, of which the Dongola kid shoes for women are made. There is a large amount of the wool and skins imported into every civilized country, and especially into North America. where women and children do not go barefoot, and need light shoes. There is an extensive interest arisen of late in the United States in regard to this goat, and large flocks of them are being formed in many localities.

the side ones are four feet wide and the middle ones seven. The dark space in inches to 3 feet 8 inches apart. Plant pot, with a filtering medium in the

Good Pruning Knife. Any one having tried to cut the old wood of raspberries and blackberries without a proper tool knows that the

job is anything but a pleastnt one. The force necesshould draw the writer in Farm and Fireside says: I have lately come across a knife that works well. I have tested it and find it superior to anything I have

PRUNING KNIFE. Illustration, one might suppose a knife birds, and the farmers are declaring a of such shape would slip off instead of war of extermination against them. cutting. But that is not so. In testing The evidence of experts was taken who it one will be surprised how nicely it had examined the contents of the stomwill do the cutting. It will slip just achs of hundreds if not thousands of enough to give the drawing motion, and them, killed at various seasons of the thus it will sever the hard cane from year, and they all pronounced them inthe stub with the least outlay of jurious to farmers as being grain eaters strength. The illustration represents and also destructive of fruits and leaf the shape of the knife exactly as it buds, and that the insects they ate should be. A good blacksmith should were but few, and not among those be able to make one out of a wornout most troublesome in gardens and orflat file. It should be inserted in an old chards.

hoe handle, or something of that order.

Starting Grape Vines, I have had good success in inducing profits are made. The utilization of young grape vines to make a vigorous foods that are usually wasted will pergrowth the first year by the following mit of keeping more stock and cheapenmethod: When set they are cut base to ing the cost of production. A leading two or three eyes and from these they New York farmer states that the savusually start a number of canes. Some ing of only 1 cent a day on the cost of let all of these grow the first season, each cow in the State would amount to others remove all but one. I do neith over \$6,000,000 a year. The gain of er. Any plant to make a good growth only one quart of milk a day would needs plenty of leaves. When my vines make an additional profit of \$12,000,000 start into growth in the spring I pinch in one year.

grow. Those that are pinched back form a nice bunch of leaves which serve to shade the ground and take in from the air for the benefit of the remaining cane. When a sufficient number of leaves have matured, the canes which have been pinched back are removed to save further work in keeping them pinched back. By this method I have had vines of Delaware make as much growth the first season as they usually do in two.-Burrell Stephens.

First Principles with Bees. Bees when frightened by smoke will immediately gorge themselves with honey and lose all inclination to sting. The most vicious colony of hybr.ds may be controlled by using a little to-

bacco in the smoke. The prosperity of a colony depends upon the fertility of the queen. If weak colonies have become populous in one season kill the queen and give them au-

Toads, skunks and mice are great enemies to bees; see that they do not have access to the aplary.

Increasing or dividing should be done as early as possible, but not until stores are coming in abundantly.

Drones are just as essential as any other bee, but too many are a nuisance. This may be controlled by cutting out drone comb and substituting worker comb or foundation.

Drones may be prohibited in objectionable colonies by dividing early in

the spring. "Keep all colonies strong."

Care of Milk and Churning.

As soon as drawn from the cow, put the milk where no bad odors can reach it, or better, as soon as a pail is filled strain it into the can and place in a tank of cold water or run through the separator, if one is used. If ice is plentiful, reduce the temperature of the water to 45 degrees and practically all the cream will be obtained. Do not mix the night's and morning's milk if the best grade of butter is expected. Change the water in the tank often enough to prevent its becoming foul. If the water is kept at about 55 degrees, rangement of pipes for heating is practically all the cream will rise in shown in the accompanying cut. The twenty-four hours. Skim, and when width is eighteen feet, the length as enough is obtained for a churning, raise may be desired. The walls are four to a temperature of 60 to 65 degrees to feet high. The benches are set on the ripen. Hasten the ripening by using ground and are eighteen inches high; sour skim milk as a starter. In winter churn at 65 degrees; in summer 55 to 60 is preferable. As soon as the granules are the size of wheat grains, draw off and wash until all the buttermilk is removed. Work, salt and market as soon as possible. If you are so unfortunate as to get a poor grade of butter it must be consumed at once or it will soon be unfit for use.

Prepare your ground with a fine pulthe benches represent the filling of either in hills or drill rows. When your spout, which is placed under the icestones or broken bricks for drainage of corn is large enough to plow, commence the beds. There are seven distribut- by plowing the first row on the side of ing heat pipes, one three inches in diam- the field. Skip every other row. When eter at the top, which branches into you have gone over the entire field in four inch and a half pipes on the no:th this way commence plowing the rows side, and three on the south. Whether which have been missed. I find that steam or hot water be used, the pipes by this method it is much easier to turn must slope sufficiently to cause the without breaking down corn at the water to flow in a steady current. The ends, especially so after corn is knee depth of soil in the benches is ten high or higher. In dry hot weather this inches. The best way to heat a house method of plowing keeps down the of this kind is by steam. The steam is weeds better, and is less injurious tocondensed on its passage and the wa- the roots of the corn. This method reter is returned to the boiler, thus form- tains the moisture much better than ing a steady circuit through the pipes. plowing the rows as they come. We are able also to kill weeds in the center of rows much more readily because those that have not died as the result of the first plowing may be killed on the second .- S. A. Hofman.

Crops that Pay Best. Small farms can be made to combine sary to cut an old many advantages. Some poultrymen woody cane is grow plums in the poultry yards, and sometimes quite also keep bees. Others grow early vegenough to pull up etables under glass and also grow two a whole raspberry or three crops in the open ground. One plant. To make gardener near Philadelphia makes a cutting easy one large profit on four acres, on which he grows only lima beans. Another makes object to be cut. A with late with late cabbage. To attempt to "farm" four acres in the usual way, with wheat, corn, oats, etc., would cause bankruptcy. The crops that pay best are those that require the most hand labor.

The English Sparrow. A law has been enacted in France seen. Looking at exempting the sparrow from the prothe accompanying tection which is given to insect-eating

MADE A LIVING BY MARRYING.

Young Couple Worked the Continuous Performance at Country Fairs.

"I am afraid that this is a very wicked world," said a well-known minister of the gospel, with a smile. "My congregation was kind enough to offer me a vacation last fall and I seized upon in the State where I was formerly loone of the towns that I visited a counan invitation to visit the grounds and perform a wedding that had been put forward as one of the leading attractions of the week. The business men of the town had contributed liberally toward wedding presents which were to go to the first couple who would come forward and agree to be married on the grounds. A couple having volunteered, I was asked to perform the ceremony. I accepted the invitation and married them in the midst of a cheering crowd.

"A week later I was in another small town, and it so happened that a fair tion to the report of Lr. Wiglesworth was in progress there, too, and a wedding was the star attraction. I chanced evil of drunkenness has many sad asto visit the grounds during the day, and the minister who had been en- is the fact that as drunkenness increasgaged to perform the ceremony failing es so does insenity. Last year 186 pato appear I was called upon to act in tients were admitted to the asylum as his place.

derstruck to find that they were the recovered and were discharged. At the same people that I had married a week | end of December over 130 remained, of before. I was so surprised that I married them again without having time able. This refers to one year only and to think whether I was doing right or

"After the ceremony the groom got me to one side and asked me as a favor not to give him away, using his language. He said they made a business of going around country fairs getting married, and a word from me would spoil it all. He said further that they were going up in a balloon to be married the following week, and he would get me the 'job' if I wanted it. But I had to decline as politely as I could. I really think he was disappointed when I refused."-Detroit Free Press.

RECENT INVENTIONS.

Two Westerners have designed a parcel rest and seat annex for blcycles, having auxiliary forks extending vertically from each axle, with broad seats secured to the top bar of the frame, to extend horizontally and meet the upright supports.

A New-Yorker has designed a new secret ballot, which is intended to be sealed by the voter before he leaves the booth, the ticket being shaped like an envelope with the blanks inside, one flap being perforated and detached after the voter has written his name Thereon.

Photographers can find use for a new device for taking babies' pictures comprising a sofa with a vertical piece atprovided with an opening near the center through which persons in the rear can put their hands and hold the baby on the sofa.

To provide cool filtered water for drinking purposes a new refrigerator verized surface. Mark rows 3 feet 6 attachment is shaped like a sprinkling filter into the pail and be drawn through a spigot for use.

To easily adjust new sleeves at any desired height a new attachment consists of a cord or tape looped through two eyelets in the sleeve, with a clamping hook on one end to bind the opposite, and as it is drawn through, the loose end being pulled until the sleeve is taken up to the proper height.

Lamps can be lighted without removing the chimney when the latter is provided with a Southern man's device, a hole being cut in the bottom of the chimney for the insertion of a short tube flanged at one end and provided with a spring gate through which the match is pushed to touch the wick.

The Prince Bor d Her.

Here is the latest anecdote concerning the Prince of Wales. A young lady was presented to him at a social function. Not knowing how long she should talk to him, she naively requested him to tell her when she should leave him. "On the contrary," said the Prince, "It is for you to tell me when you are bored." Later his royal highness asked where the young lady was born. "At Glasgow. I have lived there all my "How many years did you say you lived there?" inquired the Prince, 'I am bored, sir," said the lady quietly. -Collier's Weekly

Corporal Punishment in Court. Five small boys shricked in Justice Murray's court in West Haverstraw, N. Y., while their parents thrashed them. The parents were carrying out a sentence of the court. For fifteen minutes the punishment lasted. The boys had been hauled into court for throwing stones at passenger trains. Justice Murray gave the parents the alternative of paying a \$5 fine for each boy and whipping in court, or seeing him sent to the House of Refuge.

No Native Nebraskan in Congress. There is no native of the State or Nebraska among its representatives in either branch of Congress, notwithstanding the fact that Nebraska became a State thirty-three years ago and was the twenty-fourth admitted into the Union.

Cooked Food Supplied in Berlin. A society has been formed in Berlin which purposes to deliver cooked food to poor families at the cheapest possible prices. All sorts of boiled and roasted meats and vegetables are sold on the streets. The soup wagons reseive the biggest patronage.

Rewards for Andree Relies.

Notice has been received at the Swedish and Norwegian consulate in New York that the king of Sweden and Norway has decdied to reward persons who have found objects belonging to the Andree polar expedition, and that a fund has been set aside for rewards for persons who may hereafter find obthe opportunity to visit the little towns jects from the expedition. It is supposed that the hope of reward is meant cated and renew old acquaintances. At to be an incentive to whalers and other mariners who go far north to search for try fair was being held and I received traces of the explorer and penetrate places out of the beaten path for that Electricity in Capsules.

This new compound, which is made from cheap chemicals, is put up in capsule form and when added to a certain quantity of water will furnish electricity light a house, drive an automobile or even a railroad train. But this is nothing compared to the strengthening power con-tained in a bottle of Hostetter's Stomach Bitters. It cures indigestion, dyspepsia, biliousness, liver and kidney troubles and fills the system with the vigor of health. Its Saddest Aspect.

The Liverpool Post, calling attenon the Rainhill asylum, says: "The pects. But perhaps the saddest of all a result of drunken excess. Of these "When I faced the couple I was thun- 78 were women. During the year 38 whom less than 50 are regarded as curto one asylum."

> Decision of Character. Without decision of character no man or woman ever amounts to much. -Chicao Daily News.

That operators shall at no time withhold more than two weeks' wages from miners is a recent mandate expressed by the Iowa state senate.

"For the recognition of the union and the nine-hour work day," is the cause of a recent strike of 230 brass workers in Chicago.

Better Blood Better Health

If you don't feel well today you can be made to feel better by making your blood better. Hood's Sarsaparilla is the great pure blood maker. That is how it cures that tired feeling, pimples, sores, sait rheum, scrofula and catarrh. Get a bottle of this great medicine and begin taking it new scale of hours and wages. at once and see how quickly it will bring your blood up to the Good Health point.

Is America's Greatest Blood Medicine. fused.

The debilitating drains and discharges which weaken so many women are caused by Catarrh of the distinctly feminine organs. The sufferer may call her trouble Leuchorrhoea, or Weakness, or Female Disease or some other name, but the real trouble is catarrh of the female organs and nothing else.

Pe-ru-na radically and permanently cures this and all other forms of Catarrh. It is a positive specific for female troubles aused by catarrh of the delicate lining of the organs peculiar to women. It always cures if used persistently. It is prompt and certain.
