

# ECZEMA = SATANIC ITCH.

This most aggravating and tormenting of all skin diseases is caused by an acid condition of the blood, and unless relieved through certain instrumentalities too much of this acid poison reaches the skin and it becomes red and inflamed. The itching and burning are almost unbearable, especially when overheat from any cause. The skin seems on fire, sleep or rest is impossible, the desperate sufferer, regardless of consequences, scratches until strength is exhausted. This burning, itching humor appears sometimes in little pustules, discharging a sticky fluid, which forms crusts and scales. Again the skin is dry, hard and fissured, itches intensely, bleeds and scabs over. This is a painful and stubborn form of the disease. While Eczema, Tetter, Erysipelas, Salt Rheum and many like troubles are spoken of as diseases of the skin, they are really blood diseases, because

**THERE CAN BE NO EXTERNAL IRRITATION WITHOUT AN INTERNAL CAUSE.**

If the blood is in a pure, healthy condition, no poisonous elements can reach the skin. External applications of washes, lotions and salves sometimes mitigate the itching and soothe the inflammation, but cannot reach the disease. Only S. S. S., the real blood medicine, can do this. S. S. S., the only purely vegetable remedy known, is a safe and permanent cure for Eczema and all deep-seated blood and skin troubles. It goes direct to the seat of the disease, neutralizes the acids and cleanses the blood, re-inforces and invigorates all the organs, and thus clears the system of all impurities through the natural channels; the skin relieved, all inflammation subsides, and all signs of the disease disappear.

Mrs. Lela M. Hoffman, of Cardington, Ohio, says she was afflicted with Scrofulous sores and Eczema from birth. Her face at times became so badly swollen that she was not recognizable, and her limbs and hands were very sore. She was treated by all the doctors in town without being benefited, and in her researches for relief, was told by an old physician to take S. S. S. She followed his advice and was promptly cured, and has never had a return of the disease. This was seventeen years ago. She slowly believes she would have been in her grave years ago but for S. S. S., and adds, "what it has done for me it will do for others."

Send for our book on Blood and Skin Diseases, and write our physicians fully about your case; they will cheerfully give any information or advice wanted. We make no charge for this. Address, Swift Specific Co., Atlanta, Ga.

Wood Preserver Used by Uncle Sam on Yamhill River Work.

Merits of Avenarius Carbolinum Recognized by National, State and Municipal Governments.

The fame of Avenarius Carbolinum has steadily extended, as the only bona fide preserver of wood, since its discovery in Germany thirty years ago. It has stood all tests of climate, soil and water and steadily lived down all pretended rivals. Today it is not only employed in all countries for the preservation of wood used for household articles such as houses, barns, fences, etc., but the national governments, both of Europe and America, have recognized its value in saving public constructions from decay. Following their example cities and counties have also adopted Avenarius Carbolinum for bridges, pavements, etc., and the leading ship builders and railroad companies have shown their faith in its merits by treating ship timbers, cars, telegraph poles and ties with the same never failing preventative against climatic decay and rapacious wood boring vermin both of land and water.

Great bodies move slowly, and only act after mature deliberation. It may therefore be safely stated that governments and corporations did not employ Avenarius Carbolinum until fully convinced of its money saving as well as wood preserving qualities. Private individuals desirous of lengthening the life of wood work and at the same time curtailing expenses, need not fear to follow the precedents established.

Recent local examples proving the truth of the above statements are not wanting. The reconstructed Madison street bridge in Portland has been treated with Avenarius Carbolinum, as has also the pavement at the intersection of four streets in that city where the heaviest street car and wagon traffic converge. The latter use of the compound was made at the earnest solicitation of street car managers who confidently look for gratifying results.

The gentlemen in charge of the United States engineer department for Oregon are now applying Avenarius Carbolinum to the dams and lock work on the Yamhill river, a flattering tribute to its merits which was certainly not extended until searching investigation satisfied the authorities that it was a measure of practical economy.

With such examples before them it would appear that the individual is foolish and the official almost culpable who does not protect his own, or the taxpayer's pockets by using this compound, thus saving from decay, and lengthening the life of all frame structures for which he is individually or officially responsible.

Fisher, Thorsen & Co. of Portland, Or., are sole Pacific coast agents for Avenarius Carbolinum, and it can be found at O. O. Hedson's, McMinnville, who will gladly supply information regarding its accomplishments.

Rev. A. W. Bowersox of Dayton attended the funeral of his son Arthur in Salem on Wednesday of last week. During the month of March his son was kicked by a horse on the jaw and side of head. The blow was not very severe, and but little attention was paid to the matter. The autopsy showed that the membrane on the opposite side of the head was worse injured than on the side where the blow was received. It is also supposed that there was some injury to the spine. The physicians named the ailment tuberculous meningitis. It develops that during his time, Mr. Bowersox was more or less violent. It was on this account that he was removed from the Salem hospital to the asylum a few days before his death. In the hospital it was found difficult to properly control him. It was in the asylum that his death occurred Monday afternoon.
