During last May an infant of our neighbor was suffering from cholera infantum. The doctors had given up all hopes of recovery. I took a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy to the house, telling them I felt sure it would do good if used according to directions. In two days time the child had fully recovered. The child is now vigorous and healthy. I have recommended this remedy frequently and have never known it to fail.—Mrs. Curtis Baker, Bookwalter, Ohio. Sold by Howorth & Co., druggists.

The California Consolidated Petroleum Company has behind it some of the strongest men, financially, in California. They are determined to make their oil company the most successful on the coast, and they have the brains and capital to attain this result. They are cautious and conservative, but withal aggressive, and their policy is to absorb the weak and to become masters of the field, and beyond any reasonable question, the California Consolidated Petroleum Company will earn for its stockholders dividends that will send the stock many times about par, and make many investors comfortable for life, if not rich. Its stock should be bought before it advances, as it surely will. Stock redeemable on demand at any time within 30 days from date of certificate. All money paid in installments refunded on demand at any time within 30 days from date of first payment. If you do not want your stock, send to the company and you will promptly get every cent of your money back.

There will be an interesting service of the Epworth League which will be held next Sunday evening at 8 in the M. E. church. This service will take the place of the usual sermon; it will consist in the presentation of a gavel to Harlow Mills, the League president. The gavel has been manufactured from some of the material of the old church and will be presented by Rev. Joseph Hoberg, who is perhaps more intimately acquainted than anyone else with its history, it having been built largely through his efforts. He will give some interesting facts in regard to the old church which for so many years furnished a church home for the Methodists of McMinnville. It was through the thoughtfulness of Miss Mabel Neal, the valued secretary of the League, that this gavel was secured. A very interesting time is expected, and all are invited to attend. The League topic for the evening is "Cumberers Of The Ground." Mr. Harlie Palmer will lead the meeting.

The hop crop in New York is reported unpromising on account of damage from storms. The acreage is wonderfully reduced. Up to date the English crop is also looking bad. A New York grower predicts that there will not be 200,000 bales produced in America this year, and says if growers will let their hops stand in their hop houses, they will get something for them. The California crop is reported a good deal less than last year.

The new officers of Friendship Rebekah lodge of this city installed Tuesday evening by Mrs. Naomi Wright, are: S. G., Mrs. Laura Nicklin; V. G., Miss Dortha Daniels; secretary, Mrs. Irene Taff; financial secretary, Miss Carrie Schenk; treasurer, Miss Ambia Daniels. The appointed officers will consist of Mrs. R. P. Ungerman, Mrs. N. E. Kegg, Mrs. Susie Ford, Mrs. Elsie Wright, Mrs. H. M. Bond, Mrs. D. B. Kingery, Miss Jessie Reid, Miss Jessie Bond, Miss Pearl Campbell, Miss Lulu Gilbert and Asa Gaunt, but they were not all present for installation.

M. L. Jones, president of the Hopgrowers' association, figures on 75,000 bales of hops as Oregon's product this year, which would be 15,000 bales less than in 1899. At present prices he favors picking but three-fourths of the crop, as this would insure a better quality. Picking will begin about September 1st, and 40 cents a box will be paid. If the present dry weather continues, the crop will be light, but the quality will be better. Should rain interfere, the growth of vine would be promoted, and the hops would be much heavier, but of inferior quality. The hot dry weather, he says, is hard on hop lice, and should it continue no harm would be done by this pest.

The hop crop in New York is reported unpromising on account of damage from storms. The acreage is wonderfully reduced. Up to date the English crop is also looking bad. A New York grower predicts that there will not be 200,000 bales produced in America this year, and says if growers will let their hops stand in their hop houses, they will get something for them. The California crop is reported a good deal less than last year.

M. L. Jones, president of the Hopgrowers' association, figures on 75,000 bales of hops as Oregon's product this year, which would be 15,000 bales less than in 1899. At present prices he favors picking but three-fourths of the crop, as this would insure a better quality. Picking will begin about September 1st, and 40 cents a box will be paid. If the present dry weather continues, the crop will be light, but the quality will be better. Should rain interfere, the growth of vine would be promoted, and the hops would be much heavier, but of inferior quality. The hot dry weather, he says, is hard on hop lice, and should it continue no harm would be done by this pest.
