What most people want is something mild and gentle when in need of a physic. Chamberlain's stomach and liver tablets fill the bill to a dot. They are easy to take and pleasant in effect. For sale by Howorth & Co.

Dr. C. W. Lowe, who has been in San Francisco, reports the strike situation is worse than reported in the papers. Many streets are unswept and are very filthy. Business is retarded greatly, many dealers reporting a falling off of 30 to 50 per cent. Much property is going to waste.

Rev. A. L. Platt of Brazil, Ind., accompanied by his wife, arrived in the city on Monday, and after spending a few weeks at the coast, will take up the work of pastor of the Christian church of this city, to which field of labor he was called a few weeks since. Rev. and Mrs. Platt are stopping at present with Mrs. Nelson. Previous to their departure from Indiana, about 200 friends gave them a farewell reception and a handsome financial testimonial of their esteem. The local paper, in a column write-up, shows beyond question that Brazil said goodbye with regret.

W. G. Perkins of Marshfield, southern Oregon, is here, and is so well pleased with Dayton that he will locate here and go into the merchandise business. He expects his wife to arrive here next week.

Improvements are being made on the school house in the Unionvale neighborhood. The house is being painted and a porch built and outbuildings put up. The house has been much improved in appearance and convenience.

D. A. Snyder, the past week, has been canvassing the county for fruit. He goes on his wheel. One day he made over 40 miles up hill and down. Pretty good for a 225 pounder.

George Dorsey and wife, who have decided to move from their farm to Dayton, will have a new house put up on their lots near the school house. Clifford Watson and A. Dunn have the contract for putting up the building, which will be two stories in height. The old building will be moved to the rear. This will add one more fine building to the residence portion of Dayton.

One day last week the Stontenberg threshing machine, while running at rapid speed, was somewhat smashed. A pitchfork which had become detached from the handle was, with a bundle of grain, thrown into the separator, which caused a crash. The damage resulting was two broken concaves, and 24 broken cylinder teeth, and other slight injury to the machine. The damage was soon temporarily made good by a neighbor replacing some of the broken parts from an old threshing machine owned by him, and other parts the owners of the machine had on hand. The day before the accident, a pitchfork, handle and all, was pitched into and run through the machine, causing but slight damage.

Rev. Arnold Lindsey has quit the ministry of the Christian church, and last week left for Kirksville, Mo., to take a two years' course in osteopathy, with the intention of making that school of healing his life work.

It has been reported that Dr. Smith, the osteopath, intends to leave McMinnville in the near future. The doctor wishes it strictly understood that he has located here permanently and expects to remain as long as there is a demand for his services, all rumors to the contrary notwithstanding.

Mr. McMillan of Dayton says that nearly two weeks ago he met a man named S. D. Wicks, who was stopping at Amity, who answers well the description of the man found dead last week. He was from Dakota, and was looking for land. Will Amity people please investigate?

Instructions have been issued that all points on the S. P. lines in Oregon are to have common rates with Portland on lumber shipments beginning last Saturday. This rate is 20 cents per hundred pounds to Chicago. This common lumber rate is one of the results of the community of ownership now in existence among the transcontinental railroad lines of the Harriman syndicate, under the direction of J. C. Stubbs.

They have struck a small flow of oil at New Whatcom, Wash. This proves that there is oil in paying quantities there—and here. And it is high priced oil. The thing to do is to bore for it and get it. There is as good a chance in the Polk county field as anywhere. That proposed well ought to go down, and work on it ought not to be delayed in its beginning or prosecution. Get in and bore, and perhaps this will be the first successful well in the northwest.—Statesman.

If you don't "get in and bore" Yamhill county is likely to have the first well. We have some prospects of our own over here.

Assistant United States Engineer, D. B. Ogden, who has been in charge of repairs and extensions of the Yamhill locks, says he has had about 40 men at work right along and hopes to have the job completed before the end of September.

The extension of the two walls of the lock is finished and the length of the dam has been increased to carry it still farther into the bank. The river tried to encroach the end of the dam, and came near succeeding, but the dam as now extended will prevent a repetition of anything of this kind. All that remains to be done is to complete the rip-rapping and paving of the banks on each side above the lock with stone. This work is well under way and will be completed by the middle of next month or a little later. A large amount of work has been done, all of which is of a permanent character, and has greatly improved the lock, as well as rendered impossible any wash of the banks in future.
