#### Crockery and Glassware.

Been very busy this week opening up a line of crockery and glassware which is now on display at very low prices. This is a new line with me and makes my store a complete general merchandisc store where you can buy more for your money or produce than you can anywhere else. I handle all kinds of produce and pay the highest market price for it, butter, eggs, chickens, bacon, lard, hides, etc. That line of manufacturer's samples of hosiery that I placed on sale last week has been greatly reduced in size, but there are still some great bargains in the pile, including ladies,' misses' and men's hosiery. I am showing some rare bargains in underwear for men, women and children. It will pay you to see my line before pur-C. C. MURTON. chasing.

# Stop the Blight

It is a sad thing to see fine fruit trees spoiled by the blight. You can always tell them from the rest. They never do well afterwards but stay small and sickly.

It is worse to see a blight strike children. Good health is the natural right of children. their rights. While the rest has been ill about two weeks. grow big and strong one stays small and weak.

Scott's Emulsion can stop that blight. There is no is a medicine with lots of down from the mountains by dogs, and Jos R Lewis to Jno Birch lot II

#### How Coal Was Discovered at North Yambill.

The coal prospect at North Yamhill is n the farm of Peter Goeser, who has lived there for the past 25 years. It was discovered through the curiosity of his son William, who in cleaning out a spring, found a few small pieces of shiny Miss Della Blough is on the sick list black mineral that he thought must b coal. Upon a test he found it would burn readily, and that dispelled any doubt as to the character of the mineral. A rectaric to be grant and Saturday eve-nings by Frank E. Coulter. Mind Land Green is on the sick list an inch or two thick, but unmistakably coal. He dug away at it, excavating a large basin and ruining the spring, but it was slow work for the boy and he received no encouragement to persevere with it. That was some five years ago At odd times as he could get free from the regular work of the farm he dug away at the coal seam. Early last summer he had penetrated about 60 feet in to the hill when the water flooded his tunnel and he came to the conclusion that further development was beyond It had reached the stage his power. where capital and engineering skill were necessary to go forward. The Goeser coal prospect was brought
