The Carlton correspondent of the Register speaks of a shoemaker in good templars hall "pegging a way." He tells of a literary society which "discussed" the question: that fire is more "disasterous" than water; that both sides were "Abley handled."

The West Shore comes out this month in magazine form, which is a most excellent improvement. It has a number of fine engravings, and especially one of the iron bridge at Portland as it is expected to be when finished. It has also that celebrated poem about the bridge across the Wallamet, which was published in the Reporter recently.

The "make up" of the Albany Herald on the fisheries question, reminds us of and old preacher who once told some boys of the bible lesson he was to read in the morning. The boys, finding the place, glued together the connecting pages. The next morning he read at the bottom of one: "When Noah was 120 years old he took unto himself a wife, who was then"—turning the page—"140 cubits long, 40 cubits wide, built of gopher wood and covered with pitch inside and out." He was naturally puzzled at this. He read it again; verified it and said: "My friends, this is the first time I ever met this in the bible, but I accept it as an evidence that we are fearfully and wonderfully made."

An Explanation.

ED. REPORTER:

An item in your paper of Feb. 3d, referring to the WCTU, calling in the books on "Broom Drill" demands a brief explanation.

Neither the society, the president nor any committee, was consulted at all with reference to these books, and hence could not have granted or refused their use to any one.

We believe the WCTU would not be unwilling to grant any reasonable request to assist in any good work.

M. E. SATCHWELL,
Pres. WCTU.

A Pleasant Retort.

EDITOR REPORTER:

I noticed an article in the Register in reply to something that Dr. Howard said in regard to Lafayette which surprised me, as I have known the Dr. for many years. I took it upon myself to speak to him concerning it. I asked him if he did not intend to answer it. He said, "No; when a man falsifies and won't admit it, he always gets angry."

He further said, when I read the article, it put me in mind of what the shunk said to the man after hitting him fair. There said the shunk you smell as bad as I do. "No, I'll not answer the man, I believe in retribution. When one tries to pull another down, by showing his superiority, he will sooner or later fall to the same level." The Doctor is a reticent man, and that's all I could get out of him in regard to it. A SUBSCRIBER.

The deep sea fishing company at Astoria have large demands for their catch. Everybody is hungry for fish. There is a big demand but no supply. From Portland, the Dalles, Walla Walla and this valley as well as points as far away as Denver, order the fish, which at the mouth of the Columbia are unequalled in flavor and variety, and from the demand it is believed that the new vessel which was specially built for the business will meet with great success. Years ago this was one of Ireland's hobbies.

"Half Caste" which was so cheerfully accepted by our weekly patrons recently, will now be published in the Daily. Save your copies.
