R. Lanning, of Pullman, is visiting friends in Yamhill county, after an absence of nine years. In 1877 he was in company with L. H. Cook, in the first steam thresher ever used in the county. It is amusing to listen to the tales of dread in the minds of men and women here, on the advent of that innovation. But the machine worked, and never blew up. In forty-two days the company earned \$2,260. The work of 1877 has not since been improved.

What a Doctor Related

To a reporter of the Kalamazoo, Mich., Telegraph, Dr. Francoise, the well known veterinary surgeon, said: In the spring of 1883, while handling some carbolic acid which I was about to use for some purpose in the practice of my profession, I accidentally spilled some of it on my left leg between the ankle and the knee. Well, sir, I didn't think of its being any very severe injury at the time, though it made quite a painful wound; but I had a terrible time with that leg. On the place where it was burned with the acid there came a running sore which never left me for three years, and which might have been there yet if I hadn't used S. S. S. It discharged a serum like matter and was very painful at times. It was a great inconvenience to me in my business, for a man to be a veterinary surgeon must be both active and muscular. Well it was queer, but I couldn't find anything that would cure that would cure that sore. I submitted to the treatment of a number of physicians in turn, and tried various remedies, both standard and empirical, in which I had considerable confidence. But I got no better. After suffering great pain and pecuniary loss for three years, I concluded to try it myself. I tell you I was rather discouraged, but last spring I began taking S. S. S., and felt better right off. After using six bottles, averaging a bottle every seven or eight days, I was cured up. That leg was all right, and it has never bothered me a bit since. I am kind of mashed on that medicine, but I have good reason to be; I can't believe it would cure anything; I have heard a great deal of what it has done, but you see this instance of which I have told you was a cure of which I had personal and positive knowledge.
