### King O'Mally, The Wild Irishman.

Superintendent of the old and powerful Home Insurance company, of New York is here in the interest of his company for a few days before he returns to San Francisco. The western office Life Insurance is the only solution of the labor question. That is why the German government makes all her subjects insure for something, she takes the position that no man should assist in bringing a family into the world to be thrown out on the cold charity of others in case of his death. Every man can carry something if only one thousand on the 10, 15 or 20 year plan, should you die during the period the family receives the benefit, if you live you receive it yourself. All the great men of the world carry more or less insurance. The following are some of them:

One of the curiosities of the vegetable kingdom was revealed in this city. A lady has been very carefully nursing a choice bulb, and was getting along with it fine, until a farmer friend called yesterday and insisted that the treasure was a potato. Investigation revealed the fact that it was a spud for certain. It seems that a potato had been used to assist in the propagation of other flowering plants, and an eye of the murphy sprouted in the soil. Anxious days and "nights of labor" thus speedily vanished into gloom, and the pet flower of the family was summarily ejected from the conservatory.
