A civil engineer has discovered that there are over six hundred different shapes to pears. When any one describes anything as "pear-shaped," he is certainly giving a pretty wild description.

The GAR boys wish to return thanks to all who so generously assisted them at the drummer boy entertainment.

If you wish to restore the bloom to your wasted cheek, and so improve your health that plumpness and strength will succeed emaciation and debility, purify your blood with Ayer's Sarsaparilla. This remedy will benefit you more surely and speedily than any other.

As Seen by Other Eyes.

Looking from the car window as the train winds around the hills between Yamhill and McMinnville, only this thought finds words: Surely nature has done her part towards making her fields and people rich. Location is picturesque.

This small town, slumbering in this rich valley seems to be the prettiest between Portland and Yaquina bay. The people are kind and well-disposed; houses painted; public buildings in good order. If there is one thing needed more than another, it is a little attention to details, to small things that the Yankee sees at a glance. I miss the well-arranged kitchen, gardens, flower-beds, clean show windows. The only answer for the reason of this is "No time." This is a great country for wheat. But what that has to do with the time of the villagers I cannot understand. May be the philosopher of the village is correct. If he wait till winter he will not want any greens, and the rainy season, which never fails, will clean windows. TRANSIENT.
