## Let the Ads Guide You When Shopping

**Why of Sponge Shortage**  
For several years now, people have been wondering why there are so few natural sponges on the market, offered at prices almost beyond reach. The shortage is usually blamed upon the war. This, however, is not the reason. Department of commerce explains that the big western Atlantic sponge beds were blighted by fungus in 1939, and that recovery of the western Atlantic's shallow water sponge beds may require at least five years more, and the deep water beds from 10 to 20 years more.

**Cat Facts**  
Total American cat population is about 21 million. Strays and unnumbered cats number approximately 10.5 million, notes the American Feline Society, Inc. Twenty per cent of all American families own one or more cats.

**Africa: Spider**  
One African spider can almost completely liquefy a fish two inches long in less than three hours. Another large spider has been observed in captivity to devour small snakes in the same way.

**Evaporated Milk**  
Evaporated milk may be successfully whipped if it is first chilled thoroughly. Two tablespoons of lemon juice for each cup of milk may be added to help stiffen the milk.

## 'Soil Surgeon' Declared Seedbed-Making Boon

**Performs Multiple Work, Cuts Needed Time in Half**

A new, efficient device for producing finer, smoother seedbeds is the "Soil Surgeon" now on the market.

Designed for use in a plowed field only, the device does the combined work of a double-disc, spiked toothed harrow and a float—and manufacturers declare it gives the farmer a finer, smoother seedbed in half the ordinary time.

The exclusive use of the soil surgeon after plowing does not turn up dormant weed seeds or plowed-under vegetation, thus giving a cleaner growing crop and richer soil. It levels the ground, fills all air pockets, and seals the moisture

This "soil surgeon" is designed for use in a plowed field only. It does the work of a double-disc, a spike-toothed harrow and a float—and is said to give you a finer, smoother seedbed in half the time.

in the soil, thereby making for quicker germination and a higher yield.

Sturdy and simple, the soil surgeon consists of two heavy steel pans with raised sides, to permit loading with dirt for added weight. These may be used singly or bolted together, depending on the desired width to be covered.

To the bottom of each pan are bolted 20 double-edged cultivator knives, each provided with a bearing to permit it to follow easily and automatically the tractor's line of travel. These heavy-duty knives slice the four and one-half inches of soil into one-inch strips, while the action of the pan pulverizes, smooths and levels the sliced soil in a way not approached by any other instrument currently in use on the farm.

The field should first be worked in the direction of plowing, using as many sections side by side as the tractor can pull with weight adjusted. The final finish is obtained by pulling the soil surgeon across the line of furrows. The soil surgeon should also be used as a crust breaker for all oncoming crops to mulch and kill small weeds.

## Pacific Island Farm

"Pigs is pigs," no matter where you find them—even on the Pacific Island of Guam in the Marianas. On farms established by the U. S. naval government on Guam, American sailors instruct natives in modern agricultural methods. Produce from the farms is used for naval personnel (who are fond of food anyway) for the rehabilitation of the natives. In the photo an American seaman is driving some of the pigs to feed.

## Proper Carburetor Use Cuts Farm Fuel Costs

A heavy tractor operating under a load with the carburetor slightly out of adjustment may burn a half-gallon more fuel per hour. In the average 50 days a year that farm tractors operate, the tractor may burn 250 gallons more fuel annually than it should.

Proper carburetor adjustment would save 10 per cent of the total fuel burned in farm tractors annually.

## For Quick Cough Relief, Mix This Syrup, at Home

Here's an old home mixture your mother probably used, but, for real results, it is still one of the most effective and dependable for coughs due to colds. Once tried, you'll swear by it. It's no trouble at all. Make a syrup by stirring 2 cups of granulated sugar and one cup of water a few moments until dissolved. No cooking is needed. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Now put 2 1/2 ounces of Finex into a pint bottle, and fill up with your syrup. This makes a full pint of splendid cough medicine, and gives you about four times as much for your money. It keeps perfectly and tastes fine.

And you'll say it's truly excellent, for quick action. You can feel it take hold swiftly. It loosens the phlegm, soothes the irritated membranes, and helps clear the air passages. Thus it eases breathing, and lets you sleep.

Finex is a special compound of proven ingredients, in concentrated form, well-known for its quick action on throat and bronchial irritations. Money refunded if not pleased in every way.
