MILL CITY, OREGON, THURSDAY, JUNE 23, 1949

### Looking Up Paul Smith to Race and Down Lebanon Horse July 24 the Canyon The big race between man and July, when he had to dodge holiday Oregon Boost

### By CHARLES WOLVERTON

The taxpayers of the Mill City will be paid, because he'll never bill track July 24. them.

I'm refering to Don Sheythe, who as chairman of the building committee of the board, has guided the conmost beautiful and practical school buildings in the state.

When the credits are passed around thanks are due to Chairman Ramon Roberts of the board, and to Al Ad ams, who has superintended the conams, who has superintended the con-struction of as fine a piece of work Jungwirth's as has been erected in this Canyon. But here is the reason why Don Sheythe has a special claim on \$35,in change. When the bids were opened, the lowest contractor's estimate was almost \$200,000, or more than was almost \$200,000, or more than \$35,000 above what the board could Plant Opens spend on a much needed school. The board, although inexperienced in the vast details of building, felt sure the building could be erected for the amount set aside. Al Adams, a young Stayton contractor, who couldn't put up the required bond but had done a lot of preparatory work and study, also felt that \$165,000 would do the So the board took the long job. chance that it could build the school, and Don, as chairman of the building committee, was assigned the responsibility.

For the past three months, Don has had but little time for his own affairs. Working out contracts, buying materials, shaving a dollar here and a dollar there, it's been a fulltime job

But the results are already manifest in the fine building that now is shaping up so beautifully in a picturesque seting near the park. Our children will enjoy school now-perhaps. At any rate, the surroundings

orse in on at last.

of Paul Smith, Mill City's 64-yearschool district owe a certain gentle- old iron man and marathon walker, man something in the neighborhood has been accepted. He'll race a horse of \$35,000, but it's a debt that never and rider on the Lebanon Meadows

It's really not news to the people here in the Canyon. For Paul has been observed by hundreds almost every evening, striding it off at a struction of what will be one of the pace that makes young men blink newcomers, here's a brief outline of with wonder, up and down the high- the man: way, above and below Mill City.

The race track will give Paul a bet-

**New Gravel** 

A \$75,000 industrial enterprise be gan operation in the Canyon this week-the biggest rock and gravel plant esat of the Willamette Valley. The new plant, located on the Marion County side of the North Santiam, was built by the Jungwirth Construction Co. Increased demand for gravel, sand and rock in connection the rise in building operations here, decided John Jungwirth and his son, Clarence Jungwirth, on their expansion plan. They had been operating a much smaller plant in Lyons for a number of years.

The new plant is located on a huge gravel bar about three miles west of Mill City. There a large quantity of natural sand, as well as rock of varous dimensions.

At its highest point the plant is about 60 feet high. The gravel pit area is about ten acres. The rough rock and sand is entered satisfactory.

in the plant by truck at a ramp. Thence it is conveyed by rubber belt are such as to make school a pleas- to a separating assembly, where the Haseman to Memorial Hospital in will be held in Silverton Friday at 2 although Councilman Robert Veness bright as the out-of-doors. It will be rock is screened by size. The boulders heated by a system that's the last then fall into a hammermill, powered word in modern design. Warm water by a diesel engine. The rock is broksurges through miles of pipe imbed- en by large bars revolving at a high

traffic in his jaunt from Albany to Finally the long standing challenge Mill City, 40 miles of gruelling test. And at that time he had to race against himself, finding neither man

nor beast to accept his challenge. The Lebanon race will be for 75 niles, quite a day's hike for a horse, but no problem for Paul. Wanna bet? Paul Smith's prowess as a walker and athlete of great endurance are well known to the Canyon, but for

He went the full distance from Los Angeles to New York in the Bunyan a proportionate share of praise and ter break than he had last Fourth of Derby 25 years ago and came in 19th (he'd have done better, but his manager was too tight to keep him in hikes in the Northwest, or was high own-the first time they've had a diin the money; he toted provisions to years, once carrying a stove from Mill City to Quartzville, 15 miles of rugged mountain walking.

### **3 Idanhans** Hurt in Crash

Three men were injured, one serpickup they were riding in collided Pass. with a truck three miles west of Idanha

Calvin Cannon, 18, of Idanha, underwent surgery in a Bend hospital to release presure on his brain due to a skull fracture. He had not regained consciousness early this week and his condition was reported a grave.

Richard Cannon, 21, also a passenger of the pickup, was confined to the same hospital for 96 hours. He suffered a minor concussion when he was thrown from the truck by the impact. His condition is reported as

Charlie Cannon, 26, who was in the diedwhile supervising work on his Salem for treatment. He was released p. m.

### Highway Fete Bids Called July 7th **Given Eastern For Paving Highway**

#### An enthusiastic eastern Oregon i eady to pitch in to make the opening of the North Santiam highway ometime in August a rousing affair.

That was the report of an upper Canyon delegation after conferring Traffic Lights Tuesday in Redmond with a Chamber of Commerce council of several

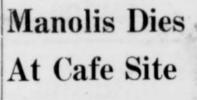

cities across the Cascades. The delegation, headed by Ed Vickers, president of the Canyon Commercial Club included Mrs. Ray Johnson, Otto Russell, Howard Baldwin and Mrs. Gordon Skidmore.

Mr. Vickers reported that the representatives from Bend, Redmond, Burns, Madras, Prineville and other shoes; he won many long distance towns consider the new road their recet route to "their capital." Bands, miners here in the Canyon for many paraders and caravans of cars were promised.

enthusiasm was not lacking. Robert and Clay Cochrane, manager of the Salem Monday night for invitations to a long list of notables, Chambers of Commerce, private citizens who have contributed to the drive to get the road, and to many who person-

ally or by family connection contribiously Saturday evening when the uted in the early discovery of Minto

Tentative plans are for an eastmeets-west motif, and invitations are being prepared to have both Gov. Douglas McKay an dthe governor of Idaho participate by meeting the day of the celebration.

# **Council Favors**

The City Council Wednesday evening took action to install stop lights in the business section on the Marion County side to eliminate a serious traffic hazard.

Carl Kelly, street commissioner was instructed to work out a plan with the state highway commission to place stop lights at the top of the highway grade above the Red & White store and on the bridge. Mayor Harold Kliewer's proposal, which was outlined to the council and to the City Long Range Planning Com-

mission the night before, was to have On the other side of the Cascades, the two lights syncronized so as to Veness, secretary of the Mill City keep one way traffic around the dan-Chamber of Commerce, Mr. Vickers gerous corner and at the same time providing for safe crossing of the Salem chamber, worked out plans in street below by pedestrians.

Also, another question to be worked out with the highway commission is the proposed closing of the underpass from the Shepherd addition to Highway 222. The commission had told Lee Ross of the planning commission it would install a drain at that point on the highway and elim-

inate the pool that usually collects at the foot of the hill in front of the Silver Saddle station if the viaduct were closed. By so doing, drainage would be provided for the Shepherd tract and the CBI housing and park areas.

> The council, following a recommendation of the planning commission, voted to work out a plan with the state.

In connection with the same drainage area, some means will have to be found to eliminate a swamp that forms against the railroad grade. Efsame vehicle, was taken by Dick projected cafe near Gates Tuesday, the grade have not been successful,

### State Will Surface New Road

The North Santiam highway be tween Niagara and Detroit will be paved soon. Bids were called July 7 by the Public Roads Administration n Portland Wednesday for the surfacing of the 13 miles, which has een hacked through the North Santiam Canyon by the PRA and shaped into a first class highway. Grading is scheduled for completion sometime in July.

The paving program is the last phase in the completion off one of the most difficult highway jobs ever undertaken in the Northwest. Relocation of the North Santiam highway was necessitated by the Detroit Dam, the basin of which covers the route of the old road-which was one of the most tortuous and dangerous

nountain routes in the Northwest. Besides the paving, there remains the completion of the Breitenbush bridge, and conside able grading and filling between Mongold and the damsite.

The Kuckenberg Construction Co. had the contract for building the existing grade and it's taken almost two years to do the job. In addition to the rough terrain, the company had other serious difficulties to meet. The old highway had to be kept open. The railroad had to be kept in oper-

ation. Because of the steep sides of the Canyon, moving off rock at the top usually resulted in avalanches on the old road and railroad.

The new highway has given central Oregon its first adequate route directly into the Willamette Valley, which means also that U. S. 97, a forts so far to get the Southern Pa-, favored route to California, and an cific railroad to place conduit under alternate road to eastern states are alternate road to eastern states are now soon to be opened.

ded in the floor-the most economical rate of speed. method of heating yet devised.

They've thought of about everything. An emergency room for the sick child. A A display window for and separated into hampers. trophies. Everything that goes for a gym you'll ever see.

It's a vast building, too. Looking down its long corridore, it's a full drained off. city block from one end to the other.

There is boldness and modernity in its design. It's functional, and beschool building not trying to look like anything else.

Landscaping will extend from the front of the new building all the way to the athletic field. Such a building deserves the proper setting.

Don, and Al Adams, althought they have their fingers crossed, believe today, with the building now far en ough along to hazard a guess, that it can be built for the \$165,000 allotted for it. If it should run a few The community is getting the biggest bargain in a school building that is possible in these time of costly construction.

There's one change I'd like to see in the new school building. I'd like to have them rip out a wall and install there a cornerstone, with the names of the board and Al Adams inscribed thereon. And with no reflection on anyone, the name of Don Scheythe should be carved in largest letters.

To the horseburger merchants in Portland the authorities are saying: "Neigh! Neigh!"
