From where I sit... by Joe Marsh
For The Ladies: A Diet That Really Works
We went out visiting the other night and the ladies were talking away about weight-reducing diets. One of them had a special "15-day Hollywood diet" guaranteed to slim her down fifteen pounds' worth. Another was living on bananas and skim milk!
I might have known the missus would get the bug, too, and sure enough the other day she asks me, "Joe, what kind of a diet do you think I ought to go on?"
"Mother," I say, "the only diet I would ever recommend to anyone is moderation. I wouldn't

To the Woman Who Preserves Foods at Home -
Preserve Foods by Freezing - it's easier, quicker - results are better
Freezing foods is simple. It's the easiest way of preserving... requires half the time, half the effort. There are only seven steps to follow for freezing... fourteen for canning.
With a Deepfreeze home freezer, you no longer spend long tiresome hours over a hot stove, or go through the drudgery of washing and sterilizing jars. You save time, work, food and money.
Freezing is nature's way of preserving foods. It seals in all the quality, flavor and food value... it retains the appearance, texture and color of the choice fruits and vegetables you grow or buy. And it keeps them SAFE from food spoilage.
The Journal of the American Dietetics Association (June issue, 1948), Cornell University, states that no case of food poisoning from frozen foods has ever been reported.
