## Now Hospitals Are "Banks," Too!

Doc Simpson was saying, "Hospitals are building up 'bone banks' that work just like blood banks. When bone is needed, the surgeon takes one from a refrigerator, cuts it to the right shape and simply splices it in."

"You doctors are sure making progress," I says, "but tell me, are any of the patients fussy about whose bone they're getting?"

"No sir!" replies Doc. "No more than they worry about whose blood they get. No one yet asked for a bone from a man who went to the same school or church he did."

From where I sit, it would be a better world if we were half as willing to accept other people's ideas and tastes, as we seem to be willing to accept their bone and blood. There'll always be differences. Some like buttermilk, others would rather have a sparkling glass of temperate beer. But underneath we're pretty much the same—deserving each other's respect and tolerance!
