When Is It Right To Kill?

Recently a certain physician was charged with murder and publicity swept the nation over a question that is not new-the advisability of "mercy killings".

This editor has given the question, not only on this occasion but at previous times, considerable thought and meditation. One must admit that those who carry the banner in favor of such killings do have some points. Many persons, after having watched some one they loved in incurable pain, have prayed that the afflicted one might not have long to live, and death's coming brought a type of sweet repose. But, be that as it may, the mortal man with wisdom great enough to decide whether innocent people should live or die has yet to come into existence.

It has been my privilege to know over the years many fine and respectable doctors. Their character has been without question and I have considered their friendship of intrinsic value. As a matter of fact, with many of these men I would entrust my life. However, there must be a line of demarkation and this would be it. Entrusting of life is one thing, but any thing, thought, or principal that would destroy such a sacred trust should not itself be allowed to live.

The law of gravity is at times very severe and there would seem times when it might be convenient to break. However by this time most folk realize that it cannot be broken without the costly consequences. God's laws also at times would seem convenient to break but with parallelism to gravity they cannot be broken.

While the problem of where to begin an appeasement with the mercy killers would be tremendous, the question that would dwarf it into oblivion would be, where would it end.

I am reminded of the wise parent who in reprimanding a disobedient child gave this sage bit of advise. "There are certain things in life we cannot have". Certainly there is a truth for us. There are certain factors which cross the horizon of our life that cannot be ours. The taking of a human life must fall into that category.

Editors Letter Box

There are times when community problems, personal complaints, constructive suggestions and such become very much like the weather. Everyone talks about it and nothing is done about it.

Sometimes if we talk to the right publish it. We would of course, like held if the writer wishes.

Old man winter took another bang at the Lyons area, with the telephone company suffering the hardest blow, tearing down the lines which had just been rebuilt from the previous storm. 'Too Little for Brains' Idea Is Hindering Research Medicine

who is doing research work at one of the New York cancer clinics. He made me promise not to use his name because he was afraid he might be blacklisted by the foundation which pays his salary.

I began by asking him to sketch in his pre-research career.

"What made you go into research?"

"Like a lot of young doctors," he said, "I couldn't get used to sitting

by while a patient died simply because I didn't know anything else I could do for him. Every time I looked up into the eyes of relatives gathered around the bed of a man in the last stages of cancer, I told myself that Billy Rose my job wasn't to

go on using the hit-or-miss techniques but to get into a laboratory and help find the real cure."

"How did you go about getting

"I made the usual applications," said the M.D., "but I soon found the hospitals and universities had funds to hiro research men, and that I couldn't get a job unless a foundation paid my salary. To complicate things, most foundations won't give you a fellowship unless you first have a job. In addition, it's almost impossible to get a grant until you've published a certain number of scientific papers and, of course, you can't publish such papers until you've worked in a laboratory and had a chance to do research worth writing about.

"It finally boiled down to this-I could work for nothing in a cancer laboratory, or I could take a job paying \$120 a week doing research for a cosmetic outfit. Well, I had just gotten married and was ready to settle for the money, but my wife wouldn't hear of it-she went out and got an office job and made me stick to my test tubes."

"HOW LONG did you work for

"About a year," said the doctor, "and then the head of the medical center-a very decent guy-squeezed me onto the payroll at \$28.87 a

You could have earned more washing dishes." "We managed to get by," said

the medico, "but the following year my wife had a baby and had to quit ber job. After that, it was pretty rugged. As, for instance,

then the temperature plunged to & in-law, Mr. and Mrs. Perry Clipfell 4 a.m. and continued to stay at a hospital January 28. She has been named Patricia Marie.

Mrs. Sam Bridges was brought home over the previous month. the last of the week from the Salem Memorial hospital following an appendectomy.

The B. J. Thrailkill family have moved into the J. H. Johnston house recently vacated by the Chet Grimes family.

Mr. and Mrs. Art Andersen entertained with a canasta party at their home Friday evening, present were Mr. and Mrs. Jack Linglass and Mr. and Mrs. Lawrence Teagan of Me-

Mr. and Mrs. Laurence Walworth spent several days in Portland where they attended funeral services for his aunt Mrs. Laura McDonald.

Kenneth Johnston of Bremerton, Wash., spent the weekend in Lyons where he was called by the sudden illness and death of his mother Mrs. Daisy Johnston.

Mrs. Catherine Lyon spent the weekend in Portland at the home of her daughter and family.

Little Sandra Duggan, daughter of Mr. and Mrs. Jack Duggan was brought home from the Dornbecker hospital in Portland, where she had spent some time for treatment of exzema

Some boys like snow and some don't. There are several in this neighborhood who will be glad to see the ground again. They say it isn't any fun to leave their bicycles at the highway and walk through the snow to deliver their papers, but nevertheless they are right on the job.

Mr. and Mrs. John Kunkle who are pasturing their young stock on the Keith Salchenberger place near Jordan, report extensive damage done by dogs to several young calves.

Today, I'd like to tell you about a talk I had with a doctor

"The usual 10-year grind," he said. "Four years of college, four more at medical school, a year as intern, and a year in residency train-

we couldn't afford to buy a crib,

and the youngster had to sleep in a donated baby carriage. "Somehow, though, we pulled our way through, and by the end of the following year I had gotten a couple of research pieces published. With these to back me up, I applied for a fellowship paying \$3,000 a year." "Minus withholding tax, I pre-

"It may not sound like much. but I felt like John D., Jr. when the grant came through," said the doctor. 'Last year, I went through the application rigmarole again-275 typed pages-and this time I got

"WHAT DO YOU DO to earn all that money?" I said.

"I'm in charge of three cancer projects and help on half a dozen others. On the side, I run a throat clinic, work in the wards and give seminars."

"Any chance of a raise?"
"I'm afraid not," said the doctor. and, as far as fellowships are concerned. I'm getting near the end of the line. I'm 29 now, and the foundations don't like to make grants to men over 30."

"There's always the job in the industrial lab." I said.

"It may come to that," said the M. D., "but I hope not. No matter what it pays, I want to keep plugging away on cancer. It seems a lot more important than developing a new shade of face

The day after our talk, I hap pened to pass the medical sky scraper in which the young doctor works, and I noticed that an addi tional wing was under construction. Dozens of steel workers, bricklayers and carpenters-all averaging around a hundred a week-were getting in each other's way

Over the half-finished entrance was a space which looked as if it might eventually be filled with a block of marble on which a fitting inscription would be carved.

"I know what it ought to be," I said to myself. "'Too much for bricks, too little for brains."

UNEMPLOYMENT SPIRALS

At a meeting of the local firemen Wednesday night Sam Palmerton was re-elected Fire Chief and Warren Stoll was re-elected Sec. Treasure. Other officers elected were president, Jack Haseman; vice prsident, Frank New; 1st. Captain, Homer Thacker and 2nd. Captain, Wayne Woodward.

Carl Schaffer was named chairman of the committee to finish the interior of the fire hall.

Mr. and Mrs. Lloyd Girod and sons returned Thursday p.m. from a two 78 RPM POPULAR RECORDS week vacation along the west coast, in Vernonia and Lebanon, Oregon.

A horse's kick resulted in a broken leg for John Tucker Saturday. He was immediately taken to a Salem hospital for treatment.

Saturday night Mr. and Mrs. Warren Stoll entertained at their home Mr. and Mrs. Lloyd Girod, Mr. and Mrs. Frank New, Mr. and Mrs. Jerry Pittam, Mr. and Mrs. Carl Schaffer and Mr. and Mrs. A. R. Synder.

Weekend guests at the Henry Heibert home were Mr. and Mrs. Eldon Haley and sons.

Idanha awoke Tuesday morning to 10 degree sub-zero temperature and frozen pipes. However, things are not always what they seem, as last year was thought to be one of these in seven year winters.

Due to a breakdown the unemployment people were not able to be in Detroit Tuesday to sign up the unemployed as usual. Those wishing to sign up had to drive to Mill City.
