

You Can Now Plan and "Build" Your All-Electric Kitchen on Your Dining Room Table at Home

When you start to plan an all-electric kitchen for your new home, or to remodel your present one, a neighborhood kitchen planning specialist or appliance dealer can help you "build" the new kitchen on the dining room table weeks and months before construction gets under way.

He probably is no magician, but he brings the kitchen, including draperies and samples for floor covering, so that you may select everything from the room arrangement to the fittings. Today, Hotpoint, a leading producer of electric kitchens—and this includes planned home laundries—has outfitted thousands of kitchen dealers with miniatures of all the automatic pushbutton appliances that have been developed to save the housewife time and work.

The planning specialist will drop around in the evening when the family is together, carrying a little black suitcase. When the case of kitchen fittings is opened, the kitchen engineer opens his suitcase and pulls out a board divided into one inch squares made of linoleum or composition board. This is floor for the kitchen you are going to "build."

If you are building a new home you may have architect's drawings showing the room size, windows, doors and radiator locations. The visiting specialist takes these drawings and places walls which simulate your new kitchen on his miniature floor. If you are going to remodel your present kitchen he measures its dimensions and makes a floor plan on a pad of squared paper.

When the basic room is "constructed" you are ready to select and place the floor appliances and cabinets. There will be the refrigerator, the electric range—perhaps in the apartment house size as well as the standard; the sink enclosing the dishwasher or separate dishwasher which can stand alongside the sink; a selection of base and wall cabinets in various sizes.

Among his aids for kitchen planning the specialist will have diagrams which show three, or possibly more, basic kitchen designs such as the common "L" shape, the "U" shape, or the kitchen in which the appliances

are arranged along opposite walls. After selecting the basic floor design for your appliances, you determine how each should be placed in order to create the greatest accessibility to other parts of the house and the outdoors. For example, the refrigerator will be located at the point nearest the door where supplies arrive.

Center Work Points

The range is frequently at the point closest to the dining room or eating nook. Most kitchen planners prefer to have the sink—sometimes called the "clean-up center" because it can include the food disposal and automatic dishwasher—between these two points. Foods taken from the refrigerator usually go to the sink before they reach the range. This works in reverse as meal leftovers are transferred to storage containers at the sink and then placed in the refrigerator. Also the center position of the sink makes water convenient to both refrigerator and range.

Another point that the specialist will advise is to have a window above the sink. This not only permits better light for cleaning jobs, but also offers a view when you are doing chores at the sink.

When the floor layout has been settled, you select the wall-cabinets. There are different sizes for areas over working counters, the range and the refrigerator. The number of these handy storage units is limited only by the wall space available.

In a well-planned kitchen the amount of space needed in the wall-cabinets should be determined to a considerable extent according to the specific appli-

ances. For example, should you select an 8 cu. ft. refrigerator you need a total of 24 cu. ft. of dry storage space close at hand for foods awaiting preparation.

Home economists at Hotpoint, Inc., have determined that a three to one ratio of dried to refrigerated foods make a very adequate storage center. The cabinets over and near the range should contain the condiments and such dry foods as cereals and others that go directly to the range from the package. Of course, the equipment and utensils used for cleaning should be near the dishwasher sink.

All the foregoing steps in building your kitchen on the dining room table can be accomplished in the same time it has taken to read about them, if you have no unusual complications.

The next, and probably as important as any other step in the process, is the selection of the colors and type of decorations you want to "personalize" your kitchen. You have two basic elements to consider—the floor covering and the tops on your base cabinets.

Change Color Scheme

The color scheme of your curtains and any decorative pieces that enter in are equally important but, unlike the floor and the base tops, they can frequently be changed. The floor and the cabinet tops will be with you many years if not for the rest of the time you may use the house, and they must have colors and patterns that you know you will enjoy living with.

Many of the larger department stores and home furnishings stores have divisions which not only supply floor coverings and drapes, but also take a complete contract for the appliances and all other fittings. This type of transaction has one advantage in that it assures you that a single "family of mechanics" will do the entire job. Also, you have to deal with only one merchant.

If you are going to build or remodel, by all means make inquiries about this "build-it-yourself-in-miniature" service. It takes much of the guess work out of procuring your new kitchen

DETROIT

RUTH SKIDMORE
Mrs. Ray Johnson, Mrs. Cal Schlador, Mrs. Pat Crawford and Mrs. Gordon Skidmore were delegates from the Detroit Woman's Civic club to the Marion County Federation Convention at Silverton, April 28. Mrs. Johnson was elected County Auditor for the Federation.

Mr. and Mrs. Cal Schlador were business visitors in Silverton, Saturday.

The Detroit Woman's Civic club will give a dance, June 3rd, in the school auditorium.

Mill City Lodge No. 144, I.O.O.F. meets every Friday night. Visiting brothers welcome.

FOX VALLEY

Several Fox Valley folks and contestants attended the amateur show given at the Mill City theatre Thursday evening. The two small Prideaux children, Kathryn Johnston and Cecil Bassett were from Fox Valley.

Mr. and Mrs. Gene Miller who were living in their trailer house near Mill City, have moved their trailer to the Albert Julian farm in Fox Valley. Miller is a grandson of the Julians.

Mrs. West with Mrs. Jack Johnston spent Monday in Salem. They took Mrs. Baker, who spent last week visiting here, to her sister's home in Salem. They also called on Mrs. Roy West at 380 Fairview and at the Gus Plenge home near Liberty. Mrs. Plenge is a sister of Mrs. Baker.

The annual Mother-Daughter banquet at the Lyons community church will be May 9th in the church social rooms. Mothers of the vicinity are invited to bring a daughter and attend the banquet and evening entertainment.
