## Here's a Kitchen Transformed!

Who would suspect that this kitchen, as old fashioned as the clock above the sink, could become a beautiful modern kitchen without a lot of expensive alterations! But look below to see how it was transformed.

Symbolic of the transformation is the electric clock that replaces the old mantel timepiece. Alterations? Sure, but not expensive ones, because standard steel kitchen units were used and no structural changes were made. The window remains and the new cabinet sink was attached to the old plumbing. A soffit above the wall cabinets and the addition of wall tile are extra features. Note the large number of drawers and compartments in the double-bowl sink and base cabinets.
