

Envoys to Sing at Community Church

The King's Envoys male quartet from Pacific Bible college, Azusa, Calif., will be featured in a program of well loved hymns and favorite negro spirituals at the Community church on South First and Juniper tomorrow at 8 p.m.

The Envoys present a sparkling variety of quartet numbers, solos, instrumental brass trios. This group has just recently returned from a tour with the Pacific Bible college a cappella choir during which they sang before capacity crowds. They have also been featured in numerous Youth for Christ and other youth rallies throughout southern California.

Rev. Joseph L. Logsdon, minister, counselor and religious educator, who accompanies the group, will bring the Gospel in word. Well known for his contribution to youth, his timely messages for today are illustrated from the rich experience of many years of Christian ministry.

The personnel of the quartet includes Joe Rogers of Azusa, first tenor; Gene Pumphrey of San Diego, second tenor; Charles Burt of Long Beach, baritone, and David Kirk of West Point, bass.

Looks like the mile-a-minute era is about to be succeeded by the mile-a-second age. News reports over the weekend indicate the Long Range Proving Grounds in Florida has fired a missile at a speed "in excess of 5,000 feet a second"—3,600 miles per hour.

Joining the Marines? You Better Hurry Up

The Salem marine corps recruiting station this week strongly emphasized the need for prospective applicants to take action immediately if they desire to serve with the Marine corps, especially those men of draft age.

"Regulations prohibit the Marine corps to enlist men who have received their notice to report for a pre-induction physical," stated Capt. George E. Lawrence, officer in charge of the Portland district headquarters. "For this reason, it is important that young men, who desire to serve with the Marines and who are apt to be called through the Selective Service System, act now before they are ordered for physical examination. This applies equally as well to members of the Marine corps reserve," the Captain further stated.

Also prohibited from enlisting in the Marine corps are members of the organized reserve components of other branches of the Armed Forces and the National Guard.

General qualifications for enlistment in the Marine corps are that a man be between the ages 17 and 29, single with no dependents, and pass the required mental and physical examinations. For women, they must be between the ages of 20 and 31, single with no dependents, high school graduates, and pass the required mental and physical examinations.

The Salem office of the Marine corps recruiting service is located in room 211 Post Office building.

Health Building Proposal Needs Local Support

Persons interested in the building of a modern Marion county health building have less than a week to get a measure which would authorize such a building on the general election ballot.

Marion county citizens are urged to write to Judge Grant Murphy at the Marion County Health Bureau before next Wednesday asking for the measure to be placed on the ballot. The proposal for such a building was defeated by a narrow margin at the primary election. The need for such a building was emphasized recently by Judge Murphy.

"Present quarters of the health department are inadequate from the standpoints of space and accessibility," he emphasized.

The proposal calls for a \$50,000 levy. To this, if approved, will be added \$25,000 in federal funds.

In Oregon, 36 persons died from farm accidents in 1949.

West's Farm Homes Of Varied Patterns

Climatic conditions and types of agriculture have produced distinct and varied types of farm homes throughout the west, reports Mrs. Margaret Tuller, Oregon state college extension housing specialist, who has just completed a federal assignment in the western states.

A steady demand for rural housing, she finds, has resulted from the fact that many farmhouses are in poor condition. Many farm families have erected temporary dwellings until they can afford permanent housing.

Since March 1, Mrs. Tuller has made two visits to each of nine western states, working with extension staffs and giving each state methods and materials which have been developed in housing by other states of the region. The rural housing program in California, for example, is being developed through outstanding co-operation between tradesmen, building material dealers, farmers and extension personnel.

Discussing various types of farm homes, Mrs. Tuller says cement and pumice blocks are being used extensively by Nevada ranch and farm owners. Because of the seasonal demands of crops, especially cotton, labor houses are a problem in Arizona. Owner-farmer operator dwellings are scarce since most farm owners live in towns.

In New Mexico, the OSC extension housing specialist was impressed by the excellent use of native materials for buildings. Built by the land owner himself in most cases, these houses have simplicity and honesty of design.

Many large farm families are found in Utah and Wyoming; thus, farmers are beating down labor costs by building co-operatively with aid from their neighbors. In Montana, the popular pattern for a farm home is a house with one story, three bedrooms and a basement.

In all states of the west, Mrs. Tuller concludes, a good job of improving rural housing is being accomplished. Farm families are utilizing the housing information available to them through their state college extension services.

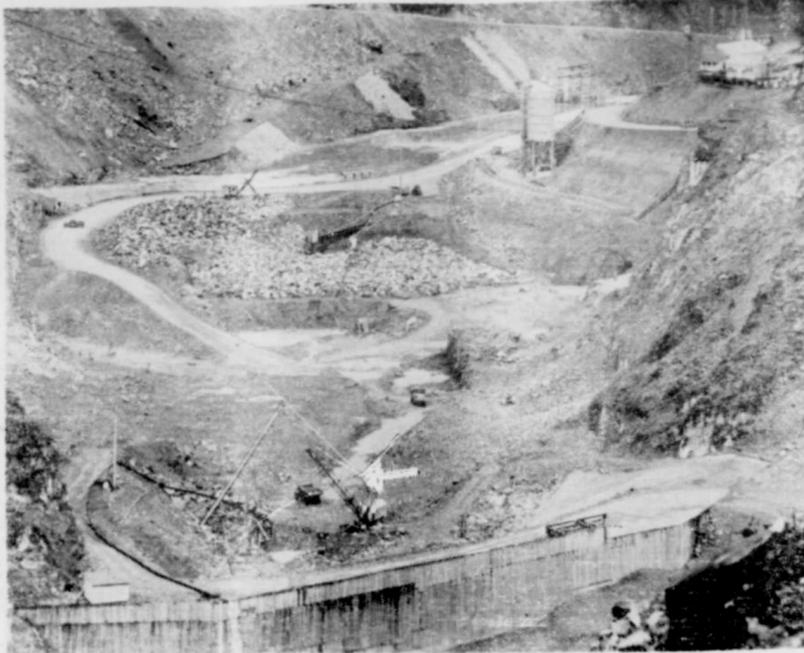

Jefferson county, Oregon, has 5,505 persons and only one doctor.

SALEM OREGON

From way down deep in the canyon of the Detroit damsite, a man-made structure began to rise this week. The white arrow points to where the first concrete is being poured in a deep crevice carved out of the rock by the rushing river in ages past and only recently cleaned out by dam workers for concrete placing. Mayor Albert Toman of Mill City and Mayor Albert Millsap of Gates represented their cities at the pouring ceremonies last Saturday. Mayor Charles Haseman of Idanha and chamber of commerce presidents of Gates, W. R. Hutcheson, and of Mill City, Bob Veness, were also among those to descend with the official party into the depths to see the historic event. The above picture was taken in June when water covered the spot where the crevices were found. (Photo courtesy Capital Journal)

West's Farm Homes Most School Costs Go for Instruction

With 65 per cent of the expenditure going for instruction, Oregon public schools spent about \$48.7 million in the school year 1947-1948, the Oregon Business Review reported in its July issue.

Nine percent of the cost went for operation of the school plant, 8 per cent for capital outlay, 8 per cent for auxiliary agencies and 19 per cent for other expenditures.

The cost was nearly \$20 million dollars more than for 1945-1946.

The major source of revenue for the support of public schools is local property taxation. Local school boards have the power to levy a tax once a year upon all real and personal property in the school district for maintenance, operation and support of the public school system of the district and for acquiring or improving school sites.

State aid for county schools is apportioned from surplus income taxes to the several counties on the basis of the number of children enrolled in the annual school census. The rate is \$10 per child for all enrolled children between 4 and 20.

Nearly thirteen million people live in the New York City metropolitan area.

Townsendites Plan Lebanon Gathering for Next Sunday

The 4th District Council of Townsend clubs will meet in Lebanon city hall at 10 a.m. next Sunday and at 1:30 p.m. will present a program of speakers including E. L. McDonald, state organizer of Townsend clubs, who will report on the recent national legislation on "pay as you go" old age insurance.

Council members will speak and candidates for public office are invited to appear on the program. The public is cordially invited to hear the Townsend plan discussed and meet and hear the candidates.

The Columbia river locks within its valley 40 percent of all the potential hydroelectric power of the United States.

IT'S LED THE FIELD FOR YEARS!

Ford Model F-5 shown, 14,000 lbs. G.V.W., one of over 175 Ford Truck models from 95-h.p. Pickups to 145-h.p. Big Jobs.

And the Ford F-5 outsells every other 1 1/2 ton truck today!

Registration figures prove it! The Ford F-5 has outstripped all sales competition since 1945. In fact, since the war's end, smart truckers have chosen the F-5 over the next leading make by a ratio of five to three! So, follow the lead of men who really know ton-and-a-half's. Switch to Ford and Ford economy!

WAY AHEAD IN SALES BECAUSE IT'S WAY AHEAD IN VALUE

- 10 ways better than the 4 other leading makes
1. Up to 1,720 lbs. more payload.
 2. Up to 1,500 lbs. higher G.V.W.
 3. Up to 310 lbs. less chassis weight.
 4. Widest (3 1/2") rear brake shoe lining.
 5. Highest compression ratio.
 6. Choice of V-8 or Six engine.
 7. Oil filter standard.
 8. Oil bath air cleaner standard.
 9. Biggest clutch lining area.
 10. "Million Dollar" Cab for more comfort, roominess and safety.

Ford Trucking Costs Less Because—
FORD TRUCKS LAST LONGER

Using latest registration data on 8,592,000 trucks, life insurance experts prove Ford Trucks last longer!
