

Fire That Fights Fire

PORT ARTHUR, TEX.—A fitting symbol of fire prevention, this 200 ft. refinery flare burns up fire hazards before they start. Far from wasting gas—as often wrongly supposed—it actually is a safety valve. During emergencies it consumes excess gases before they can build up into explosive concentrations; stands 24-hour guard to burn off possibly dangerous fumes. This unusual view of night light at the Gulf Oil refinery here was taken in a 10-second exposure at F.11 with fast panchromatic film.

OUT OF GODFREY'S TEABAG

This weather lately is certainly something. One minute it's stifling—the next you're freezing. Ever notice how women walk around on these nippy days in flimsy stuff and not seem cold? Well one of them told me her secret the other day. Yes sir, this is it. She said her hat was by Lily Dache, her suit by Jacques Path—and her snuggles by Long-John!

Television is certainly different all over the country. In New York if something goes wrong you get snow on the screen; in Virginia you get ham and gravy.

A friend of ours had a new English butler in the household, and the first afternoon he served tea to some guests. Our hostess complimented him on the appearance of the tea table but quietly remarked that there was only a small amount of lemon and cream. The butler drew himself up and said he had done that on purpose. "I always thought Americans took their tea straight."

One of my friends has just gone into business for himself. Quite an undertaking, these business ventures—and he's really gone into this in a big way. Even went so far as to buy two new cars and everything! Only he has to go halves on everything. One of the cars belongs to him—and the other to the finance company.

Honest to goodness, some of the politicians really have a soft job. They work just so long—and before you know it they're off on vacation. I'm beginning to think some of them spend more time in Florida than an orange crop.
