This is the time of year the politicians elected in November take office—and the unsuccessful candidates are still out looking for jobs. One of these losers I know is the guy who pointed with pride to a 15 per cent increase in the population in the last decade. Boy, what some guys won't take credit for!

Speaking of politicians, I remember one political rally I was at. A man got up and said to the politician: "What about those powerful interests that control you?" The candidate said: "You keep my wife out of this!"

I was once a cab driver in Chicago, you know. I wonder if cabbies today do the same things I used to do. When a young couple got into the car I'd put my hat over the rear-view mirror.

Boy, that was some storm we just had. It's kinda quiet in my backyard in Virginia now that it's all over. No wonder—all my chickens blew into Pennsylvania.

Everything's all frozen over on my pond and all the pretty girls are skating on it. I used to be an ice skater back on the Hackensack River. Could make a figure eight, too. Did it the hard way of course —two fours!

Mother Finds Washer Vital Tool

Babies are subject to change without notice.

But the washing machine handles these crises of the cribset with the greatest of ease. Modern mothers, in their crusade for cleanliness, consider the washing machine of vital importance in this campaign. The washer has proved essential to the morale, health and happiness of the American home. And it makes bringing up baby, American plan, the safest and happiest on earth.

It is easy to keep up with the quick turnover in Baby's wardrobe with the washing machine. Baby's clothes should be washed once a day, or at least every other day if they are to be kept sweet smelling and pretty.

As a rule, baby clothes do not need a long washing or pre-soaking. However, an occasional item will be easier to wash when it has been soaked.

The best way to take care of wet diapers and sleeping garments is to put them to soak immediately after use in a container half full of cold water to which two tablespoons of borax have been added. A two-gallon enamel pail with a cover is the best container to use. Diapers may be kept in this manner and washed every other day. However, they should not be kept longer than this before washing in the washing machine.

Washing Baby's cotton wrappers, knit shirts, and flannel nighties is easy in the washing machine. They are washed in the same manner as any other cotton. In time, flannelette will take on a pebbly appearance but this does not mar its softness and warmth or the attractive appearance it keeps through a long life.

Baby's tiny dresses and slips will stay fresh and dainty and like new through many launderings in the washing machine.

Clean clothes for the baby are readily provided by that essential domestic tool, the washing machine, which has become a vital necessity to cleanliness, health and morale.

Baby's wool or part-wool blankets can be washed with complete safety in the washing machine. Blankets should be washed fairly often and always in lukewarm water and rinsed thoroughly in the same temperature water.

Woolens should never be soaked, bleached or boiled. If there are soiled spots which do not wash out easily, use a soap jelly made from a mild soap. Then rinse it out immediately since soap applied directly can harm the wool. Always use a mild soap thoroughly dissolved in softened water. Woolens should be dried away from excessive heat or sunshine.

Always remove the stains from Baby's clothes while they are still fresh and before the garment is washed. Old stains may have to be bleached with an appropriate bleach. Milk stains should be rinsed in cold water, then sponged with carbon tetrachloride before washing in the washing machine.
