Auxiliary Organized at Luncheon

At a buffet luncheon Tuesday afternoon in the American Legion hall, Stayton, 138 women from various sections of Santiam valley and canyon area that will be served by Santiam Memorial hospital heard plans outlined for the organization of a Women's Hospital Auxiliary to serve the new memorial hospital.

G. W. Schachtsiek, general chairman of the campaign, presided. L. D. Barr, adviser, outlined the purpose and program of the women's hospital auxiliary and pointed to the need of long range planning for service in the new hospital and the important part the women play in fulfilling the humanitarian service of the hospital in future years. There will be a board of directors selected by a special committee as authorized to adopt by-laws and elect officers. The organization plan contemplates the formation of branches of the auxiliary in each of the communities that will be served by the hospital. Each branch will have its own officers and committees; each branch will establish chapters in farm organizations and rural areas, churches, lodges, labor organizations, industries and in various women's civic and other organizations. There will be no dues. The plan was given unanimous endorsement by the leaders present. It was announced that all women who desire to co-operate and work may become members of the auxiliary by writing Santiam Memorial Hospital, Box 454, Stayton.

PTA Ham Dinner to Be Served Sunday

Sunday, January 28th, is a must date for the citizens of this community for between the hours of 3 and 6 p.m. the PTA will sponsor a benefit ham dinner at the Mill City grade school cafeteria.

SAVE FEED
Feed-saving programs from the agricultural colleges stress the importance of getting rid of rats, cattle grubs, lice, worms and other insects and parasites that may sap an animal's vitality and interfere with efficient feed use.
Dr. Hess products can help to avoid feed waste from those causes. We especially recommend the following:
ANTURAT—really kills rats, the worst feed wasters. Effective in baits, or as a tracking poison when rats refuse frozen baits.
CATTLE GRUB KILLER—made according to revised U. S. D. A. formula. Beef cattle freed of grubs gain weight faster, cows give more milk.
POWDERED LOUSE KILLER—dust it on cattle, horses, sheep and goats for lice and ticks. Lousy cows, freed of lice, give 10% to 15% more milk.
DRYCID—dry dip you can use for hog lice in winter without wetting hogs or bedding.
SIX—new and better roost paint for control of poultry lice. Comes in can with handy applicator spout.
Let us tell you about these and other Dr. Hess products for stretching your feed supply.
