Mr. and Mrs. Ted Gillespie

Your Home  
By Frances Ainsworth

Springtime is traditionally re-decorating time at our house and we're in the midst of the job right now. Because we wanted to do a really professional job I talked to Mr. Hayes Quinn, the color consultant for the Pittsburgh Plate Glass Company. He gave me complete instructions for correctly re-painting a room.

Because so many of you will also be re-decorating, I thought you'd be interested in these suggestions. First—according to Mr. Quinn—comes the preparation of the walls. Upon this operation depends the success of the paint job. Before starting to paint, wash or scrape off all calcimine, loose paint, grease and dirt. Fill all cracks with patching plaster and sand to a smooth surface. Touch up patched spots with first coat. Even though no spots or cracks need patching, wash the surface thoroughly.

Mr. Quinn explained that the application of paint on interior plaster surfaces has become increasingly difficult, because of such things as a tendency to rush painting on damp walls. That's why these preparatory steps are doubly important. He mentioned, too, that it is not wise to use varnish sealing coats, because they may cause trouble for later painting work. One of the most important steps, he emphasized, is to read the directions on the label. By following these instructions, you are assured of a better paint job.

We are following this expert advice carefully and are mighty pleased with the results. Oil base wall paints and primers certainly gave a professional look to our rooms—and we're going to decorate the "right" way from now on!

Here's the ideal portable saw for all-around timber cutting

With the McCulloch chain saw, one man can fell standing timber easily, buck logs quickly, cut off stumps close to the ground. You can't beat it for making fence posts, cutting firewood, or for cutting and bucking timber for sale or on contract.

Amazingly light The 20-inch saw weighs only 45 pounds complete, yet its special McCulloch engine packs a full 5 hp. And look at these other features: automatic clutch stops the chain when the engine is idling; blade swivels to any angle for easiest bucking, felling, or ripping; recoil starter is kickproof; floatless carburetor permits operation in any position.
