Mr. and Mrs. Merwyn Knox plan raising a flock of turkeys again this season. They have eggs at the hatchery and have hopes of 3,500 day-old poulters the middle of this month. Molly-views

When people realize that day-to-day living is knowledge in itself, no day passes without something gained, something learned.

The daily process of living constantly calls into play all our resources, testing our wits, our sensibilities and our patience. Each day gathers into our hearts knowledge and understanding—if we permit our hearts to remain open.

The only beauty in the world is that which comes from within.

You can't always judge a person by the number of diplomas he has. To know what's good for you is a great education also.

The world would be a lot better place to live in if people only had the courage to act as good as they really are.

We don't want to conquer the world, we just want to live in it.

Las Vegas, N.M.—Pvt. Ernest L. Podrabsky, left, son of Mr. and Mrs. Ernest L. Podrabsky of Mill City and formerly an employee of The Mill City Enterprise, is one of the trainees in the Air Force Training Program being conducted on the New Mexico Highlands university campus. With him is Pvt. LeRoy H. Sohnveid of Sheridan, Ore.

The 15-week course is a basic airplane and engine mechanics program designed to develop airplane mechanics. When the program is completed, there will be 300 airmen doing their eight hours of study on the university campus and in its hangars and shops.

Highlands university, located at Las Vegas, New Mexico, is the third in size of the state supported institutions of higher learning in New Mexico, with a normal enrollment of about 1500 students. Two of the reasons that the program was placed here are: Highlands maintains a C.A.A. approved airplane and engine mechanics program on a junior college basis, and there is a large former National Guard camp three miles from the campus that had been taken over by the university for veterans and their housing. The camp could absorb many more than the 300 in the present program.
