## START BUILDING YOUR LAYING FLOCK NOW

The Albers Research Station has proved in 2 years of testing, that the way growing-pullets are managed can affect the efficiency of next Fall's laying flock as much as 20% in egg production.

Pullets grown on wire floors, or in confinement, as well as those grown on depleted range can now obtain the sun, range and soil values through their feeds.

Feed Albers WIRE GRO to birds grown in confinement or on wire floors. It is complete and no scratch is fed with it. Feed Albers PULLET GROWER to birds grown on range. It costs no more to play safe, to build real egg producers, and to hold down pullet mortality.

A fresh shipment of both Pullet Grower and Wire Gro has just arrived. Come in and get a supply today.
