It used to be thought that a cataract was a slow-forming film that grew up over the outside of the eyeball and finally obscured vision. Actually, a cataract is not on the outside of the eyeball at all, but is inside it. Cataracts are caused by slow deposits of pigments in the crystalline lens of the inner ball. Recent discoveries have shown that just as this pigment is deposited from blood sources, so can it also be removed through blood absorption.

Mari-Linn Picnic Draws Crowd
Cora Prichard was general chairman of the well attended all-school community picnic Sunday, May 20, on the new school grounds at the Mari-Linn school in Lyons.
A very large crowd enjoyed a grand lunch at noon. Races and games followed afterwards. Penny scramble, balloon hunt, horse-shoe, softball, husband calling contest, bike races, foot races and a peanut-eating contest were some of the games played.
During a drawing three gifts, left over from the school carnival, were given away. The gifts were a jacket, made and donated by Mrs. Jack Johnston; a tire, from Free's garage; and a puncture-proof tube, compliments of Phillip tire shop.
These articles were won as follows: the jacket by Mrs. Ray Short of Salem; tire by Bernice Bridges; and the tube by little Gary Taylor of Lyons.
Remembrances are a kind of friendship of man for God.
