ELECTRICAL TIPS FOR THE HOME

If Your Stairways Are Poorly Lighted and Hazardous . . .

DON'T think you have to put up with old-fashioned fixtures and insufficient wiring. Improper lighting on stairways and lack of well-placed switches can cause serious accidents.

DO install modern fixtures placed so that all the steps will be lighted. Be sure to provide switches at both head and foot of stairs to turn on each light before ascending or descending.

MEHAMA

By JEAN ROBERTS

Before a large audience of admiring fishermen Sunday, Jack Alloway of Mehama hooked a large salmon from the bridge which crossed the North Santiam. Using a four pound test leader and a self-invented spinner. He spent two hours trying to land the huge fish, which in the end got away. Jack had landed a 17 inch one that morning.

Though the river is teeming with salmon no successful fisherman has reported except Jack, who has hooked several recently. Claiming to have spent two years learning how to catch them, he says that depth and speed are important factors.

Like the weekend traffic through Mehama almost endless, composed of fishermen and boats, the population here also boasts many fishermen.

Two who netted a good laugh (but nothing else) from a fishing expedition were Jerry Coffman and Ken Kelly. Having heard of fabulous fish to be caught in Opal Lake, accessible only on foot, they hiked up hill and down, through dense brush and over rock slides, for six continuous hours, —but never found the lake.
