# Car-Saver Service

ADDS THOUSANDS OF MILES OF CARE-FREE DRIVING

Our Car-Saver Service starts with good lubrication—regularly. Not only the right lubricant in the right amount, in the right place, but a thorough inspection to catch trouble before it starts... a check for rattles and squeaks and a report on any mechanical attention needed. A complete record of service is kept here to assure car-saver service at proper intervals.

**BATTERY SERVICE:** 80% of all battery failures occur where a service call is required... our Car-Saver service protects you against this inconvenience and expense... it includes adding water... test of condition... an inspection and cleaning of terminals and cables—insurance of maximum battery capacity and life.

**TIRE SERVICE:** Let us tell you how our tire switching service can save you money through increased tire mileage. There is often more uneven wear on front tires than on the rear... rear tires wear evenly but at a faster rate... then, too, to be kept "alive," the spare tire should be run. But further, our service includes an inspection for glass, tacks, and nails embedded in the tires... a check for cuts and bruises.

**RADIATOR SERVICE:** Keeping the cooling system filled is just the start. You receive a check of the cooling system, water hoses and clamps.

These are but a few of the important car saving services you receive when you put your car in our hands.
