You—and the SCRAP METAL EMERGENCY

ANSWERS every farmer should have to questions about scrap iron and steel

- Q. Why is iron and steel scrap a matter of importance to farmers?**
A. Steel for our Country's defense program and civilian economy is being produced at the highest annual rate ever . . . and this will be greatly increased in 1952. Farm machinery and equipment needs must come from this ever-all supply. As steel production increases the need for scrap increases.
- Q. How does scrap figure in the production of steel?**
A. One pound of scrap is needed to make two pounds of steel.
- Q. Is scrap getting scarce?**
A. Yes, the supply of scrap at the steel mills and foundries is not increasing fast enough to meet the needs of expanding steel production. Yet, there are millions of tons of idle iron and steel scrap, in small amounts, on farms throughout the country.
- Q. What if the needed scrap isn't obtained?**
A. That will mean a serious loss of steel production . . . fewer products will be made of steel. It will mean more shortages of civilian products. Defense needs come first.
- Q. Why not use pig iron instead of scrap?**
A. Every ton of scrap conserves approximately 2 tons of iron ore, 1 ton of coal, nearly 1/2 ton of limestone and many other vital natural resources—to say nothing of transportation facilities. Besides, there are not enough blast furnaces to produce the iron needed to maintain production.
- Q. How can more scrap be furnished?**
A. By everybody pitching in—as we always do in every emergency—and searching out all possible sources of scrap. Manufacturers of all kinds of products are conducting scrap drives. Old ships are being salvaged . . . scrap is being obtained from countless sources including farms.
- Q. What is farm scrap?**
A. It is any worn out, obsolete, unrepairable equipment, tools or other objects made of metal. It may be resting and rusting in fence corners, in the fields, the barnyard or the tool shed.
- Q. What should be done with farm scrap?**
A. See that every bit of scrap gets to the scrap dealer located nearest to you. He will break it up into sizes used by the steel mills and foundries. He'll classify the metals then ship the scrap in carload lots. If you do not know the name of your local scrap dealer, consult your local implement dealer for this information.
- Q. What else can I do about farm scrap?**
A. Support the scrap drive organized in your locality. Work with your local Scrap Mobilization Committee in getting the scrap started back to the steel mills and foundries through the local scrap dealer.
