**Sportsmanlike DRIVING**  
  
**WAIT FOR WALKERS**  
 Pretty soft stuff! That's what pedestrians are made of. So it's a lot better not to push them around with that big motorized mass of steel and chromium—your car. Pedestrians are never bullied by cars. They are bullied by rude, incompetent drivers behind the wheel. The chief points of conflict between pedestrians and drivers are at intersections. Wait for walkers at intersections, says the AAA driver training book, "Sportsmanlike Driving." Sometimes walkers are caught midway across the street when the light turns. Wait! Keep your foot off the accelerator. Give walkers a chance to finish the crossing without running for their lives. Sometimes, when you want to turn your car to the left, the walkers have a green light across your car's path. Wait! In your big, steel car you are the one with greater strength. So you are in a position to show the greater courtesy. Turn only when crosswalks are clear. Show courtesy to pedestrians. Wait for walkers!
