Some people like company, some people don't. Some people can be polite while others turn their nose up. That is what happened when an unwelcome guest called at one of the neighbors. But it wasn't long before Tippy the dog came in contact with the little guest under the house, and it was very evident that Mr. Civet-cat was near. But after about a week of waiting and watching the lady of the house put some feed on the porch for her cats, and hearing quite a commotion went to investigate, to find the visitor partaking of the cats' supper. But with the aid of a near-by may and his gun quick work was made of said skunk.

The grass is green here, where you can see it between snow banks. My crocuses are an inch high and the violas are blooming under the snow. Now can you brag more?

MY THOUGHT of the Week: We never realize the beauty of the outdoors until we become ill and cannot get out to enjoy its wonderful beauty and freedom.

Car-Saver Service
ADDS THOUSANDS OF MILES OF CARE-FREE DRIVING

Our Car-Saver Service starts with good lubrication—regularly. Not only the right lubricant in the right amount, in the right place, but a thorough inspection to catch trouble before it starts . . . a check for rattles and squeaks and a report on any mechanical attention needed. A complete record of service is kept here to assure car-saver service at proper intervals.

TIRE SERVICE: Let us tell you how our tire switching service can save you money through increased tire mileage. There is often more uneven wear on front tires than on the rear . . . rear tires wear evenly but at a faster rate . . . then, too, to be kept "alive," the spare tire should be run. But further, our service includes an inspection for glass, tacks, and nails embedded in the tires . . . a check for cuts and bruises.

BATTERY SERVICE: 80% of all battery failures occur where a service call is required . . . our Car-Saver service protects you against this inconvenience and expense . . . it includes adding water . . . test of condition . . . an inspection and cleaning of terminals and cables—insurance of maximum battery capacity and life.

RADIATOR SERVICE: Keeping the cooling system filled is just the start. You receive a check of the cooling system, water hoses and clamps.

These are but a few of the important car saving services you receive when you put your car in our hands.
