The Debunker

BY JOHN HARVEY FURBAY PH. D.

RUBBING ONE EYE WILL NOT GET A CINDER OUT OF THE OTHER EYE

It is a common superstition that if you get a cinder in one eye, the thing to do is to rub the other eye. Medical specialists say this is all bunk; that it will do no good—unless perhaps it keeps you from rubbing the eye with the cinder in it. Rubbing the eyes is always a bad practice, doctors say, and should be avoided at all times. There are many germs on the hands at any time, and these may be transferred to the eyes, producing infections.
