Knowledge is Power

2. DOES THE MOON'S SURFACE CHANGE?

3. CAN A VIOLINIST TUNE UP WHILE THE ORCHESTRA PLAYS?

(1) "A two-year-old car is the best buy, if you can afford it," advises "Changing Times." The Kiplinger publication also urges you to buy from a new-car dealer who operates a used-car lot. His prices are probably a shade higher, but as a group, the independent dealers include a much higher fraction of the fly-by-night operators. Before you buy, find out the ceiling price from the local Office of Price Stabilization.

(2) Yes, Dr. James C. Bartlett, Jr., a Baltimore department-store executive, recently discovered a change on the surface of the moon. Huge walls on the moon's surface, photographed during the last century, have disappeared, he found. "The Baltimore Sun" reports that the British Astronomical association named the area Bartlett in his honor.

(3) Most violinists can't, but the famed Nicolo Paganini had such sensitive hearing that he could check the tuning of his instrument by a slight touch of the strings, even during the noisiest orchestral passages. Franz Farga describes Paganini's talents in a book, "Violins and Violinists." Paganini could understand every word of a whispered conversation going on a considerable distance away. He often played perfectly pure notes on a violin which was completely out of tune.

From articles in the May "Catholic Digest"

To the Public of Marion County:

In the Primary election, May 16, 1952, I am a candidate for renomination as County Assessor of Marion County, Oregon. My policy as in the past is courtesy to the public with whom I may come in contact. Attention to their problems as regards assessment and taxation.

A gradual reappraisal program without excessive cost to the taxpayers. The greatest possible economy in the operation of my office which is well exemplified by a recent bulletin published by the Oregon State Tax Commission as follows:

County—	Population	Assessor's Budget	Per Capita Cost
Multnomah	471,537	\$340,808	\$.72
Lane	125,776	86,065	.68
Marion	101,401	36,335	.36
Clatskamas	86,716	79,955	.92
Washington	61,269	28,245	.46

Washington County is the next lowest to Marion in the state.

The above well illustrates the economies practiced in my office.

The necessary activities of this office have increased so greatly in the past few years that it has been impossible for me to contact personally as many of you as I would have liked. Therefore, I take this method of reaching you.

Your support in the coming primary will be fully appreciated.

Respectfully,

R. "TAD" SHELTON
COUNTY ASSESSOR
