

January Is Clean-up Month for Roses

January is a good clean-up month for the rose gardener. Practices include removal and burning of old leaves and spraying with lime sulphur or Bordeaux mixture.

Winter sprays of Bordeaux mixture or lime sulphur are applied for control of such rose diseases as mildew, black-spot, limb canker, blight, and dieback. Bordeaux mixture for spraying roses is prepared at the rate of 6 ounces of copper sulphate, 6 ounces of lime, each mixed separately in a small quantity of water and then added to a three-gallon hand sprayer filling to capacity.

Lime sulphur for roses is applied at 3 pints of the concentrated liquid lime sulphur in a three-gallon hand sprayer. For larger or smaller hand sprayers, mix the materials in corresponding proportions.

Bordeaux is a protectant type spray and lime sulphur a clean-up spray which will burn off patches of mildew and shallow lesions on stem cankers. Lime sulphur spray should not come in contact with white paint on walls or trellises as it will turn such paint black.

Three New Insulin Preparations

Chicago—Three new long-acting insulin preparations, which offer promise in reducing the complexities of insulin administration to diabetics, were described in the current (December 27) Journal of the American Medical Association.

The new preparations, consisting of insulin mixed with small amounts of zinc, have activity ranges from about 18 to more than 30 hours, according to K. Hallis-Moller, Ph.D.; M. Jersild, M.D.; K. Petersen, M.Sc., and J. Schlichtkrull, M.Sc., of Copenhagen, Denmark.

According to the authors, preliminary studies of 65 patients with severe cases of diabetes have shown "that satisfactory blood sugar control can be obtained in such patients with a single injection of the appropriate one of the three types of zinc insulin."

They reported that the currently available insulin preparations with protracted action, if given in one daily injection, are incapable of providing satisfactory regulation of the blood sugar level in a considerable number of patients with difficult cases of diabetes.

"The results we have attained indicate that these zinc insulin preparations may offer a solution to the problem of providing a single daily injection for such patients," they added.

Zinc insulin was given to the patients daily at 8 a.m. The amounts of insulin varied according to individual reactions to the drug.

SPRAGUE TO SPEAK

Mr. and Mrs. Charles A. Sprague will tell of their experiences in New York City while Sprague served as an alternate delegate to the United Nations, at a meeting of Republican women in the Senator hotel, Monday, January 19, at 2 p.m., according to Mrs. Wm. L. Phillips, program chairwoman.

of the Mill City Theatre where anyone can learn more about this idea.

Reports have been made that show the need of fluoridation in various parts of the state. One count shows that in the Bend high school about 40 students all had "store teeth". Marion county surveys indicate that native born students have very poor teeth condition prevailing everywhere inspections have been made in the Willamette valley.

New Ford Miracle Ride

Here's new freedom from bounce, pitch and sway ... an entirely new standard of riding comfort!

If you've thought it takes gas-eating weight and hard-to-park length to give real riding comfort you ought to try this '53 Ford. For Ford's new Miracle Ride actually seems to lay a carpet of smoothness even over the roughest roads. There's no

bounce, pitch and sway to bother you, no uncomfortable roll on curves. Ford's new Miracle Ride marks a new era of riding comfort and quiet. It's another big reason why Ford is worth more when you buy it ... worth more when you sell it!

White sidewall tires optional at extra cost. Equipment, accessories and trim subject to change without notice.

The New Standard of the American Road

80% less road shock! By increasing front wheel travel and redesigning the rubber compression bumpers, front end road shock is reduced as much as 80%. Springs are tailored-to-weight of each model, for best riding comfort, whichever model you buy.

Automatic Ride Control! Ford's Variable-Rate rear spring suspension actually makes the effective spring "stiffness" vary automatically as road and load conditions change. You get a smooth, level, comfortable ride on boulevard or roughest back road.

All day comfort! Scientifically designed contour seats, both front and rear, have thick foam rubber cushions. Non-sag spring construction is firm yet resilient. Automatic Posture Control provides the most convenient seating position for all drivers.

You've got to Value Check this new Ford's 41 "Worth More" features to know why Ford is worth more when you buy it ... worth more when you sell it!

In this new '53 Ford you'll find not only a new concept of riding and driving comfort ... you'll find more of the things you want and need than in any other car in the low-price field.

You'll find the "Go" you need, in Ford's high-compression V-8 and Six engines (and both thrive on regular gas). You'll find the great, all-round visibility ... the easy handling, braking and parking you need for today's traffic. And you'll appreciate beauty that "belongs," wherever you may drive. No wonder Ford is the New Standard of the American Road.
