

Canyon Avenue--

(Continued from Page 1)
 day. If there was anything dishonest about the work performed it was more on the part of the employers who hired men when they didn't need them because they could charge the cost off to the government at 10% plus and make more profits. Why is it that 1952 shows bigger profits "after taxes are paid" than 1951 did?

Here is the clincher in the Babson report, and I consider it a most shocking admission, I quote the final paragraph in full:

"It is entirely possible that the stock market will go higher; but this possibility does not interest me. Based on all previous history, I know stocks will some day sell 100, or perhaps 200, points lower. I'm putting my hard-earned savings in the bank awaiting such a time. What money I have made has been through Patience. Who was it said: 'Patient waiters are never losers.'"

It would appear that the stage is about all set for the next depression, and anyone with any money is duly warned to hang on to their money. When finance is frozen and business refuses to venture capital unless they get their "usual" profits men must be laid off and when that movement gets into full swing you have your depression. It is just such action that

starts depressions and depressions clean up the savings of little people, thus making workers more willing workers at the wage the employer is willing to pay.

We must agree that wars are useless, but exceedingly profitable, however until the United Nations is made strong enough to prove it has authority to stop aggression we have no hope of putting a stop to wars. Who was it that prevented the League of Nations from having any force and effect at the time that Woodrow Wilson gave his life and physical strength in a futile attempt to build a World organization to end wars? Surely, they couldn't have been Republicans! Today, we have artists at controlling labor and thought control firmly in the saddle in Washington in the persons of Taft and McCarthy; and a cabinet composed of "eight millionaires and a plumber—the plumber to stop the leaks!"

Five Peak Polio Years

Polio incidence in the last five years has been more than twice as high during the preceding five years. The March of Dimes now is annually faced with an average of 35,000 to 40,000 cases in contrast to the fifteen to twenty thousand cases a year formerly considered normal.

Just Arrived... Manufacturers Life Annual Report

MILL CITY

Mr. and Mrs. Elmer L. Payne of Bonneville has purchased a home in Mill City and moved here. He will be one of the senior operators at the Detroit dam operation.

Mr. and Mrs. Shields Remine left Tuesday on vacation for California and several other bordering states.

Mill City women attending the Presbyterian meeting in Albany Thursday were Mrs. James Swan, Mrs. Lester Hathaway, Mrs. Fred Grimes, Mrs. Herbert Schroeder, Mrs. W. W. Allen. Mrs. Schroeder, who is missionary education chairman in the Presbyterian Women's association in Mill City plans to attend the two-day church session in Portland January 29 and 30.

The Gay Nighters, local square dance club, have resumed their regular meetings following the holidays. Officers elected to serve during 1953 are Al Nesbitt, president; George Veteto, vice president; and Mabel Veteto, re-elected secretary-treasurer. On the sick list the past two weeks has been Sharon Diane Berry. First

The Manufacturers Life reports Business in Force of \$1,591 million. The new business in 1952 was \$15 million greater than that written in the previous year and amounted to \$213 million.

Payments made to policyholders under their contracts totalled \$27 million and were distributed to beneficiaries and policyholders in death claims, matured endowments, annuity payments and other policy benefits, including \$3 3/4 million in dividends to policyholders.

The Assets of the Company grew by \$42 million to \$491 million. Government and government guaranteed bonds constituted 19% of Assets and corporation and municipal bonds 41%; mortgages constituted 18% of Assets, preferred and common stocks 11%, cash and other assets 11%.

The rate of interest earned on the Assets was 4.46%, an increase over the previous year's rate of 4.29%.

The mortality experience was favorable and contingency reserve and surplus now amount to \$90 million.

she had the chicken pox. Just over them, she then got the flu, and was a very sick girl. She hopes she can be back with her little kindergarten friends sometime this week.

Mr. and Mrs. John Swan have purchased the Virgil Cribbs home near the school. They moved in this weekend. Their son and his family Mr. and Mrs. William Swan, have moved into the former John Swan home.

RALEIGH HAROLD, Florist, open Sundays and evenings, flowers telegraphed anywhere. Funeral sprays, planters, pot plants, corsages, weddings, also shrubs and landscaping 319 W. Washington, Stayton. Phone 3684.

Minister and Mrs. H. E. Jull, Wilma Jull, Ralph Jull and Ellen Shelton attended the 62nd convention of the Central Willamette district of Christian churches, held at Albany last Sunday afternoon. After the session Wilma continued on to Eugene where she is attending Northwest Christian college.

Mrs. Melbourne Rambo entertained in her home Thursday afternoon for the younger set in honor of her daughter, Laura Jo, who was celebrating her fifth birthday. Spending the afternoon with Laura Jo were Patricia and Kathleen Kelly, Sonja Herlofsen, Nancy and Charlie Stewart, Nancy Woods and two of the mothers, Mrs. Max Kelly and Mrs. Charles Stewart. Mr. and Mrs. Warren Howe and

New Water-Soluble Fertilizer Ready Lyons Substation--

A water-soluble fertilizer which has been formulated to minimize risk of leaf or grass burn has been developed by a chemical company, it was announced recently. The new product, called Foliom, is now being manufactured and will be offered to the public within 30 days through distributors and dealers.

Foliom is a quickly-soluble, inorganic fertilizer of 20-20-20 composition (20 percent nitrogen, 20 percent phosphorus, 20 percent potash) It contains a chemical which keeps the product in free-flowing, non-caking condition and assists in the absorption of nutrients by the plant leaves.

Tests with radio-active tracers have shown that the plant food available in water-soluble fertilizers is absorbed by plant leaves within 30 minutes to two hours after the fertilizer is applied.

In the home garden field the new fertilizer may be sprayed or sprinkled on grass, flowers, vegetables, shrubs and trees by use of a garden hose coupled with a siphoning device. It also may be used with any one of several commercially-available spray applicators or an ordinary sprinkling can.

Additionally, Foliom is expected to have wide usage in greenhouse and nursery operations because of the increased efficiency and economy of water-soluble fertilizers in these fields.

Larry of Roseburg visited the R. C. Berry's, relatives and friends over the weekend. Returning to Mill City with them was Mrs. Howe's mother, Mrs. Nora Goodwin, who has been visiting in Roseburg the past month.

(Continued from Page 1)

The first circuit from McNary dam via Maupin and Detroit, designed for eventual 300,000-volt operation, will terminate at a major substation to be developed in the North Santiam valley. From the Santiam substation a 230,000-volt transmission line will extend to Chemawa, where an additional high capacity substation is now being developed. Also included is a second 300,000-volt transmission line between McNary and Maupin to interconnect and reinforce the existing transmission facilities at that point. For all of these facilities \$3,927,000 is requested.

Customer service facilities, mostly 115,000-volt transmission and transformer step-down facilities, to provide for added load growth of local areas total \$3,839,000 and include, among others: North Santiam valley substation.
