

Multi-purpose Detroit dam designed for flood control and generation of 100,000 kilowatts of power, constructed at a cost of \$70,000,000, was dedicated June 10. This concrete, gravity type dam has a total length of 1580 feet and a maximum height from foundation to deck of 154 feet. Impounded behind the structure is Detroit dam reservoir eight and one-half miles in length and holding approximately one and a half billion gallons of water amounting to a storage of 455,000 acre feet. Reservoir for Detroit dam is 8.5 miles in length and contains a total storage of 455,000 acre feet. Minimum pool elevation above sea level is 1425 feet. Maximum storage will give the reservoir a depth of near 400 feet at the dam. Recreational facilities are to be a feature of the reservoir as well as flood control and generation of power. (Capital Journal photo)

One of two 50,000 kilowatt generators in Detroit Dam powerhouse was found to have lost a bearing the day before the scheduled pressing of a button on June 10, and will be delayed for several weeks. Powerhouse generators are turbine fed by penstocks 15 feet in diameter. Combined output of Detroit's generators will be 100,000 kilowatts of power. Lower: Control panel for the three generators associated with Detroit dam shown with B. E. Whitsett, Jr., senior operator for the corps of engineers, at one of the controls. FRANK EDWARDS Says:

(Heard over KPOJ, Portland, at 10:15 p.m., Monday through Friday)

GONE BUT NOT FORGOTTEN: Senate Republican leaders revised their list of "must" legislation for this session of Congress, and have discarded: Statehood for Hawaii; revision of Taft-Hartley; and the St. Lawrence Seaway project. GOP spokesmen say the measures were

ASTHMA COUGHS

Don't let difficult breathing, coughing and wheezing, due to recurring spasms of Bronchial Asthma or simple Bronchitis ruin your sleep and energy without trying MENDACO. Works through your blood to help loosen and remove mucus, strangling mucus. Thus usually allays coughing which permits freer breathing and sounder sleep. Get MENDACO under money back guarantee at druggists.

sidetracked in order to enable Congress to adjourn by July 13th if possible.

SLICK TRICK: The looters have landed; the locusts are at work. The House Interior committee has approved a bill permitting private exploitation of oil and gas on Alaskan school lands. This administration should run very smoothly—it seems to be well oiled.

"A-BOMBS AWAY!" I agree with many of my listeners that the United States is no place to hold atomic bomb tests, but I can do nothing about it. Your protests should be sent directly to your Senators and Congressmen, who are theoretically in a position to stop this practice. Winds from the testing area generally blow the radioactive clouds toward the east, across the nation, across the homes of tens of millions of people. It might be less convenient for the Atomic Energy Commission to explode its bombs in the South Pacific, but it is my opinion that the rights of the American public are as important as the convenience of its public servants.

WELFARE STATE? How's business? It's great if you own a railroad. The nation's railroads are headed for their most profitable year since 1942, with a net income that will amount to about \$900 million. A large part of this increase is due to more efficient operations, says the New York Journal of Commerce. Which means, of course, that increased employe productivity is being reflected in the ballooning profits column.

The Armstrong nugget, the central attraction in Baker, Oregon's First National Bank's gold display, is valued at nearly \$3,000. The nugget was sold to the bank for about \$500 during the early gold-rush days in the 1860's.

There's only one answer...
Chevrolet trucks must be the best buy!

Fleet operators, farmers, independent truckers—truck users everywhere—buy more Chevrolets than any other make. There can be only one reason for that: Chevrolet trucks offer more of what you want.

As the official registration figures keep rolling in, they keep telling the same positive story about truck popularity and truck value: Again in 1953, for the *twelfth* straight production year, truck buyers show a clear-cut and decisive preference for Chevrolet trucks. If you're a truck user, this fact is mighty

important to you. Why? Well, as you know, trucks are built and bought for just one reason—to do a job. So isn't it logical then that since Chevrolet trucks outsell all others, they *must* do a better job at lower cost? That's why it will pay you to stop in and see us before you buy your next truck.

MORE CHEVROLET TRUCKS IN USE THAN ANY OTHER MAKE!
