Worth more and why

THERE ARE TWO generally accepted meanings of the word "worth." One comes down to cold hard dollars and cents value. The other is personal: what something is worth to you in usefulness, in pride of possession, in reliability, and in other ways.

Either way you look at "worth" we feel that you'll find the new '53 Ford worth more. And here's why:

If you could check the used car prices of last year's cars, you'd find that Ford keeps the greatest part of its original cost in resale . . . a greater portion than any other car at any price.

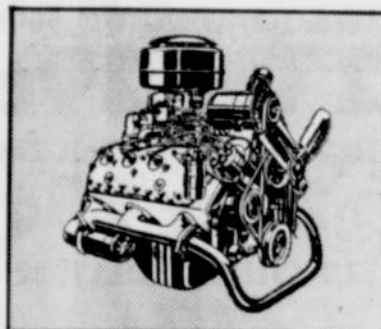

Now, as everyone knows, the amount of value a car loses between the time you buy it and the time you sell it is the actual cost of the car to you. With Ford's low original cost and high trade-in worth, a Ford costs you less to own.

And apparently a lot of folks have a lot of personal reasons why Ford's worth more to them. For that's why people are willing to pay more for a used Ford.

To help you evaluate these reasons for yourself, we have supplied a few illustrations on this page . . . and we offer you a "Test Drive" in the '53 Ford at your convenience. Check the features that you want in a car and compare them with even the costliest cars. It's our feeling that once you do, you'll never pay more than the price of a Ford.

Ford's Crestmark Body is hull-tight to keep out dust, drafts and weather. You'll find it welded where other cars are bolted, for greater strength and safety . . . to eliminate water-catching cracks where rust can get a foothold.

Here is the only V-8 in the low-price field, the same type of engine now powering most of America's costliest cars. Ford has built over 13 million V-8's! And Ford also offers you the industry's most modern Six, for even less money.

Fordomatic Drive gives you the smooth, effortless power of a torque converter plus the savings and response of automatic gears. Ford also offers you gas-saving Overdrive or easy-shift Conventional transmission.

No longer does a car need to be tank-heavy to gentle you over the bumps! Ford's new ride cuts front end road shock up to 80%. And Ford's soft, foam rubber-cushioned seats give you a new concept of driving comfort.

WORTH MORE WHEN YOU BUY IT . . . WORTH MORE WHEN YOU SELL IT
