SIX KILLS LICE

SIX is the new Dr. Hess product for killing lice on chickens. It contains benzene hexachloride—safe, quick and effective.

You don't put SIX on the birds. It's a roost paint that you apply to the perches. SIX vaporizes and the fumes kill lice on roosting birds.

Better than old-style roost paints because it's less irritating, is more stable at high temperatures, has a residual effect and is economical. A single application does the job.

Comes in a can with handy spout that puts a thin stream on the roost. Less wasteful than applying with a brush. Try this new and better louse killer. Satisfaction guaranteed.
