Music by  
The Night Hawks

how would you like to live in the "good old days"?

BACK in grandfather's time, during the final quarter of the last century, things were quite different. There were no movies, no airplanes, no automobiles, few bathrooms, practically no efficient electrical appliances. If you contracted diabetes or pernicious anemia, your days were numbered. Your blood just "changed to sugar" in the former, "to water" in the latter.

There was little protection against virulent epidemics. Smallpox vaccine was the only biological on the market. When diphtheria or typhoid ravaged a community, there was nothing to do but wait it out in hope and dread.

Yes, a return to the "good old days" would mean, among other things, the sacrifice of the major portion of the contribution of medicine and pharmacy to your health and well-being.
