the pace of progress

With almost methodical regularity we hear or read of startling new discoveries in medicine. The pace of progress in research has been greatly accelerated. Hundreds of trained people are devoting their lives to organized research where there was but one a few years ago. As soon as the value of a new drug has been established, it is made available to the medical profession. A chronic condition from which you have been suffering may yield to a new treatment today. It is wiser than ever before to see your physician regularly once or twice a year. We take pride in maintaining complete stocks of the newer medicinal agents, ready to serve you on the order of your physician.
