Harold Seely, 17, of Hubbard, for four years conducted a corn project which he increased to 2 1/2 acres the past year. His corn yield has averaged 75 bushels per acre due to the use of a good hybrid variety of seed and fertilizer, increasing his yield 20 bushels per acre. He also grew small acreages of wheat, oats and barley. Winning National honors in the Field Crops program, he received a \$300 scholarship from International Harvester. Harold has been an active participant in judging, was a member of the champion crop demonstration team.

*superstition in this enlightened age*

Do YOU STILL BURY a dishrag to remove a wart on your finger? Perhaps not, but come do. Yes, even asafetida is still worn on a string about the neck to ward off illness.

These cases are extreme, but surprisingly superstitious notions about disease and treatment are held in this enlightened age.

Before you accept secondhand statements that hint of witchcraft, consult your physician. He alone is competent to evaluate methods of prevention and treatment of disease.
