## Assistance for Tansy Ragwort Control in 1954

The Linn County Agricultural Conservation program for 1954 has been amended to provide for cost sharing in chemical control of Tansy Ragwort, says George L. Koos, chairman of the County ASC committee.

Because of the serious increase of this poisonous weed on pasture land the County Committee requested a special conservation practice for its control. This request was granted by the State and National ASC offices but too late to permit inclusion of the practice in the 2300 handbooks that were mailed out early in December listing 20 conservation practices needed in Linn county.

All Community Committeemen in the County have received a copy of the amendment explaining that the government will share to the extent of 50% of the cost of chemicals used to control tansy ragwort.

Farmers wishing to cooperate with the government in the battle against this weed should write, phone or call at the County ASC Committee office on the third floor of the Courthouse before April 1. No assistance can be given unless such application is made before time for applying chemicals.

## Test Drive a FORD... and you'll want to drive it home

Try the V or the II. You'll thrill to Ford's greater responsiveness the first time you take a Test Drive. And you'll discover that this new "Go" is yours through the full range of driving speeds! Both of Ford's new engines have an extra-deep block extending well below the crankshaft, giving the V-8 a "Y" shape, the Six an "I" shape—and you, a more rigid, smoother, quieter engine. Both are short-stroke engines, too, which means less internal friction, more usable energy, greater gas savings and long engine life.

### Feel how Ford's new Ball-Joint Front Suspension cushions the bumps.

You'll find a new kind of ride... level and smooth... even on rough, rutted roads. And, because Ford's new ball-joint front suspension is simpler than the conventional type... with 12 points of wear eliminated... that "new car" feel lasts longer.

### Look at your beautiful surroundings.

You'll see why Ford interiors for '54 set a new high in beauty. For here is a matchless blending of fabric, color and styling. Every detail says "fine car" quality from the new upholstery and trim to the unique new Astra-Dial Control Panel. And you'll find there's all the "living room" you'll ever want or need.

### See how Ford's optional power assists\* make your driving easier.

Unlike other low-priced cars, Ford offers a power-lift system that operates on all four windows. And Ford's power-operated front seat moves up and down as well as back and forth. Ford also offers you power brakes, power steering and Fordomatic.

### Your fun really begins when you own a Ford

Of course, you can't fully appreciate the many, many "worth more" advantages that are yours in a '54 Ford until you actually own one. You'll find that your Ford provides the careful craftsmanship of a hull-tight Crestmark Body, the added safety of Full-Circle

Visibility, the easier action of suspended clutch and brake pedals and the convenience of Center-Fill Fueling... advances which make your Ford more fun to drive. And only Ford in the low-price field brings them to you. Why not join the swing to Ford!
