*help the physician help you*

AN ACCURATE CASE HISTORY is an invaluable aid in arriving at a correct diagnosis. In order to get the information needed to make an accurate diagnosis, the physician must ask you many searching questions. If you answer his questions frankly and accurately, he has a valuable group of facts with which to work. Withholding information from him only serves to obscure the very result you seek.  
 We are not diagnosticians, but we are skilled in the art of compounding and dispensing medicine at the order of your physician.
